Currency Wars with China and Japan in Western Newsmagazines Damien Ng, 2022-02-27 This book explores China's currency wars with its trading partners in four Western newsmagazines Time The Economist L Express and Der Spiegel Based on both quantitative and qualitative approaches the interdisciplinary approach adopted in the research draws on two analytical frameworks from the realm of critical discourse analysis van Leeuwen's socio semantic inventory of social actor representation and van Dijk's concepts of macro rules as the overarching approaches to understand the changing dynamics of international relations and the global economy through Western media The sample in this study consists of 160 texts half of which are focused on China and the other half on Japan across a period of 12 months in 2010 China and in 1987 Japan Through the comparison of Western representation between China and Japan the similarities and differences in their coverage have been revealed as even more striking with regards to global politics and the international economy The findings obtained from the empirical research have revealed that China was not only reported more unfavourably than Japan in terms of depth but also across a broader range of areas spanning economics politics and military affairs It has also emerged that all the four Western newsmagazines tended to centre their coverage on the US and China in 2010 and the US and Japan in 1987 although they did not speak in one collective voice with regard to their coverage of China and Japan

Telephone Directory United States. Department of Defense, 1982 Each issue includes a classified section on the organization of the Dept

Technology, Business, Innovation, and Entrepreneurship in Industry 4.0 Teresa Guarda, Cristina Fernandes, Maria Fernanda Augusto, 2022-12-15 This book presents the most recent innovations trends and challenges in several aspects of Industry 4.0 including the key technologies and business impacts The book is relevant to a variety of stakeholders due to Industry 4.0's broad impact in many fields Topics include digital workplace solutions for employee engagement entrepreneurship and innovation and Blockchain for business security The authors cover Industry 4.0 both from a theoretical and applicable standpoint

Convergence of Blockchain and Internet of Things in Healthcare Arun Kumar Rana, Vishnu Sharma, Ajay Rana, Maksud Alam, Suman Lata Tripathi, 2024-04-22 The Internet of Things IoT and blockchain are two new technologies that combine elements in many ways A system where the virtual and physical worlds interact is created by integrating pervasive

computing ubiquitous computing communication technologies sensing technologies Internet Protocol and embedded devices A massive number of linked devices and vast amounts of data present new prospects for developing services that can directly benefit the economy environment society and individual residents Due to the size of IoT and insufficient data security security breaches may have a huge impact and negative effects IoT not only connects gadgets but also people and other entities leaving every IoT component open to a wide variety of assaults The implementation and application of IoT and blockchain technology in actual scientific biomedical and data applications are covered in this book The book highlights important advancements in health science research and development by applying the distinctive capabilities inherent to distributed ledger systems Each chapter describes the current uses of blockchain in real world data collection medicine development device tracking and more meaningful patient interaction All of these are used to create opportunities for expanding health science research This paradigm change is studied from the perspectives of pharmaceutical executives biotechnology entrepreneurs regulatory bodies ethical review boards and blockchain developers Key Features Provides a foundation for the implementation process of blockchain and IoT devices based on healthcare related technology Image processing and IoT device researchers can correlate their work with other requirements of advanced technology in the healthcare domain Conveys the latest technology including artificial intelligence and machine learning in healthcare related technology Useful for the researcher to explore new things like security cryptography and privacy in healthcare related technology Tailored for people who want to start in healthcare related technology with blockchain and IoT This book is primarily for senior undergraduates graduate students and academic researchers in the fields of electrical engineering electronics and communication engineering computer science and engineering and biomedical engineering

Continuous Auditing with AI in the Public Sector Lourens J. Erasmus, Sezer Bozkus Kahyaoğlu, 2024-09-18 The effectiveness of internal audit activities is important for the sustainability of change in the public sector In this sense the tools and techniques used and the level of competencies of public sector auditors are decisive This book deals with the effects of current technological developments in the public sector on auditing and risk management activities Therefore it is a resource for public internal auditors to create a digital audit strategy based on artificial intelligence AI and blockchain based applications Institutionalisation of their structures is important for public sector internal auditors For this basic requirements future expectations and best practices are explained The digital business model is presented to produce value added audit findings and outputs that guide public internal auditors and all digital era stakeholders This book is a pioneering work based on continuous auditing continuous monitoring approaches using various AI and blockchain based tools and techniques There is nothing more valuable to the success of a public internal auditor than a detailed understanding of the business The important lesson in developing business knowledge especially in the new audit universe emerging with digital transformation is that all auditors must understand that they never finish learning about business processes risks and control points in the digital era

They must constantly push themselves to be motivated and learn about the business operations they audit to implement new audit approaches powered by AI In addition to obtaining up to date business information from process owners and stakeholders public auditors responsible for conducting an AI based continuous audit programme should also look inside their departments for a different perspective on business information that impacts continuous audit programme phase details and has the potential to add value It should be noted that the additional source of information begins with your individual audit experience digital skills and qualifications
