Solidity Smart Contracts Rangel Stoilov,2019 Learn about Solidity smart contracts Truffle Ganache Ethereum Blockchain programming cryptocurrency DApps IPFS and the Remix IDE About This Video Learn the essentials of the Ethereum blockchain Understand basic and advanced concepts of the Solidity language Learn how to deploy your DApp using Heroku In Detail For the past couple of years there has been no bigger breakthrough in the IT world than Blockchain technology The extremely fast growth of the industry market and the technology itself has led to an enormous shortage of programmers who truly understand the blockchain technology Along with the latter smart contracts have also emerged and with them Solidity The aim of this course is to give you the easiest and the best route to becoming a blockchain developer We will be focusing on smart contract development with Solidity in the Ethereum ecosystem You will learn to create your first smart contracts in the Ethereum blockchain even if you are a complete beginner and know nothing about programming or Solidity The author will show you how to create your first smart contracts with Remix the online IDE and we will go through all the features that Solidity gives us as a programming language You will also be able to set up your environment to start coding with Solidity on your local machine The author will show you what settings and configurations he used to set up VSCode and how to successfully install Truffle on Windows After that he will teach you the basics of the Truffle Framework and how to make it work with Ganache as your own private Ethereum blockchain network We will also test out our Solidity smart contract behavior by unit testing with Chai and Mocha If you are a serious developer you need to know that your code is working the way you expect it to When you are finished you will be able to create your own first decentralized application with Solidity and Truffle While other courses are filled in with unnecessary information that makes them hard to navigate through and leave you confused this course will take you step by step from a complete beginner to a master of Solidity and smart contract creation in the Ethereum ecosystem

Learning Blockchain in Java Hong Zhou,2019-01-24 This book is for anyone who is interested in learning or understanding blockchain technology through step by step programming The ideal readers would be those with basic Java programming knowledge either beginners or

intermediate as this book shows how to develop a preliminary blockchain system in Java You may have wondered what blockchain is and how it works and you may have heard of mining and wallet There are quite a few books available out there talking about them When you read those books you may develop pieces of understanding here and there Well we know that learning by doing is the best education approach which is what this book offers In this book each chapter begins with an explanation of blockchain concepts before moving on to discuss relevant Java programs that implement those concepts You will accumulate knowledge via hands on experience in code writing and learn several versions of blockchain systems The book includes all required source codes which are also available online After reading and practicing along with the book you are ready to go as a blockchain developer One advantage of this book is that no third party software packages are required to follow along with the tutorials everything explained in this book can be accomplished with OpenJDK and the sample codes are written entirely in Java The book is divided into multiple chapters with succeeding chapters building upon the concepts reviewed in previous chapters However each chapter covers inherently different material and so they can also be taken independently The last chapter discusses the importance of secure coding and concludes the book with case studies of several malicious attacks that had occurred in the cryptocurrency world
