The Revenge of Gaia James Lovelock, 2007-08-02 In *The Revenge of Gaia* bestselling author James Lovelock father of climate studies and originator of the influential Gaia theory which views the entire earth as a living meta organism provides a definitive look at our imminent global crisis In this disturbing new book Lovelock guides us toward a hard reality soon we may not be able to alter the oncoming climate crisis Lovelock s influential Gaia theory one of the building blocks of

modern climate science conceives of the Earth including the atmosphere oceans biosphere and upper layers of rock as a single living super organism regulating its internal environment much as an animal regulates its body temperature and chemical balance But now says Lovelock that organism is sick It is running a fever born of the combination of a sun whose intensity is slowly growing over millions of years and an atmosphere whose greenhouse gases have recently spiked due to human activity Earth will adjust to these stresses but on time scales measured in the hundreds of millennia It is already too late Lovelock says to prevent the global climate from flipping into an entirely new equilibrium state that will leave the tropics uninhabitable and force migration to the poles The Revenge of Gaia explains the stress the planetary system is under and how humans are contributing to it what the consequences will be and what humanity must do to rescue itself Basic Fluid Mechanics and Hydraulic Machines Zoeb Husain,Zulkifly Abdullah,Zainal Alimuddin,2009-02-27 Following a concise overview of fluid mechanics informed by numerous engineering applications and examples this reference presents and analyzes major types of fluid machinery and the major classes of turbines as well as pump technology It offers professionals and students in hydraulic engineering with background concepts as well as practical coverage of modern turbine technologies fully explaining the advantages of both steam and gas turbines Description design and operational information for the Pelton Francis Propeller and Kaplan turbines are provided as are outlines of various types of power plants It provides solved examples chapter problems and a thorough case study **Bibliographic Guide to Technology** New York Public Library.
