Engineering Project Appraisal 2nd Edition:

Engineering Project Appraisal Martin Rogers, Aidan Duffy, 2012-07-03 In most cases of civil engineering development a range of alternative schemes meeting project goals are feasible so some form of evaluation must be carried out to select the most appropriate to take forward Evaluation criteria usually include the economic environmental and social contexts of a project as well as the engineering challenges so engineers must be familiar with the processes and tools used The second edition of *Engineering Project Appraisal* equips students with the understanding and analytical tools to carry out effective appraisals of alternative development schemes using both economic and non economic criteria The building blocks of economic appraisal are covered early leading to techniques such as net present worth internal rate of return and annual worth Cost Benefit Analysis is dealt with in detail together with related methods such as Cost Effectiveness and the Goal Achievement Matrix The text also details three multi criteria models which have proved useful in the evaluation of proposals in the transportation solid waste energy and water resources fields the Simple Additive Weighting SAW Model the Analytic Hierarchy Process AHP technique and Concordance Analysis There is a full discussion dealing with risk and uncertainty in these models With many worked examples and case studies *Engineering Project Appraisal* is an essential text for both undergraduate and postgraduate students on professional civil engineering courses and it is expected that students on planning and construction management courses will find it a valuable addition to their reading

Using the Engineering Literature, Second Edition Bonnie A. Osif, 2011-08-09 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links on a topic engineers need the best information information that is evaluated up to date and complete Accurate vetted information is necessary when building new skyscrapers or developing new prosthetics for returning military veterans While the award winning first edition of *Using the Engineering Literature* used a roadmap analogy we now need a three dimensional analysis reflecting the complex and dynamic nature of research in the information age *Using the Engineering Literature Second Edition* provides a guide to the wide range of resources available in all fields of engineering This second edition has been thoroughly revised and features new sections on nanotechnology as well as green engineering The information age has greatly impacted the way engineers find information Engineers have an effect directly and indirectly on almost all aspects of our lives and it is vital that they find the right information at the right time to create better products and processes Comprehensive and up to date with expert chapter authors this book fills a gap in the literature providing critical information in a user friendly format

Infrastructure Development and Construction Management J. C. Edison, 2020-10-12 This is a comprehensive book on infrastructure development and construction management It is written keeping in mind the curricula of construction management programmes in India and abroad It covers infrastructure
