Evolution of Low-Dimensional Biosensors in Food Safety, Agriculture, and

Healthcare Tanmoy Das,Tanima Bhattacharya,2026-02-27 This book provides the principles of nanomaterial based biosensors including methods of transduction molecular recognition and amplification fabrication techniques and development of point of care devices for environmental food and medical diagnostics It also examines future trends difficulties and prospects for disposable sensing devices It focuses on sensors and sensing networks for strain pressure surface bio potential and direction It underlines the selection of low dimensional carbon materials matrix and substrate materials their interactions and structural designs Key features Covers the design manufacture applications problems and future of low dimensional biosensors Focuses specifically on different uses of low dimensional materials in food agriculture and biomedical domains Discusses the sustainable industrial and resource efficiency of low dimensional materials Addresses the influence of low dimensional materials on human health environmental and agricultural aspects Offers a comprehensive assessment of material properties for various 2D systems This book is aimed at researchers and graduate students in materials science nanotechnology and biosensors

Smart Technologies in Healthcare Management Nidhi Sindhwani,Sarvesh Tanwar,Ajay Rana,Ramani Kannan,2024-06-28 Offering a holistic view of the pioneering trends and innovations in smart healthcare management this book focuses on the methodologies frameworks design issues tools architectures and technologies necessary to develop and understand intelligent healthcare systems and emerging applications in the present era

Smart Technologies in Healthcare Management Pioneering Trends and Applications provides an overview of various technical and innovative aspects challenges and issues in smart healthcare along with recent and novel findings It highlights the latest advancements and applications in the field of intelligent systems and explores the importance of cloud computing and the design of sensors in an IoT system The book offers algorithms and a framework with models in machine learning and AI for smart healthcare management A detailed flow chart and innovative and modified methodologies related to intelligent computing in healthcare are discussed as well as real world based examples so that readers can compare technical concepts with daily life concepts This book will be a useful reference for academicians and the healthcare industry along with professionals interested in exploring innovations in varied applicational areas of AI IoT and machine learning Researchers startup companies and entrepreneurs will also find this book of interest
