English as a Foreign or Second Language Mohammed S. Assiri, 2015-09-01 This book offers a brief review of the theoretical perspectives and empirical findings that have shaped our understanding of salient facets of English language teaching, learning and testing. It also communicates my personal views in regard to certain issues in these three domains. The book is divided into five chapters that range in their foci from theory to practice. Chapter one presents the most influential theoretical perspectives that have sought to account for the processes involved in second language acquisition and the roles of the so many variables that affect how a learner acquires a second language. The second chapter discusses several methods and practices commonly used in EL2 English as a foreign second language teaching. Chapter three highlights the differences between Basic Interpersonal Communication Skills and Cognitive Academic Language Proficiency or BICS vs CALP as well as the various categories of language learning and use strategies. In the fourth chapter the presentation centers on EL2 testing and assessment. Chapter five is wholly devoted to my personal views including my philosophy of language education, critiques of some scholarly views and practical recommendations. Such views have had their inspiration and support from my experiences both as a learner and as a teacher.

Methods and Technologies for Learning G. Chiazese, M. Allegra, A. Chifari, S. Ottaviano, 2005-03-04 For more than a decade the rapid growth of ICT and its use in education have generated a lot of changes in traditional educational structures as well as interest in defining new models for designing advanced learning solutions. This book provides an overview of international perspectives regarding the latest innovations and results in different fields of education. In particular it is addressed to all those who are interested in exploring methodologies and extending their knowledge of current research in education and training technologies. The wide variety of contributions provides an interesting and useful account of some of the major issues and controversies facing researchers, academicians, professors, educational scientists and technologists in most of the educational contexts in which ICT is applied. Over 90 papers are featured and these are divided under headings including Online Education and Training, Innovative Teaching and Learning Technologies, Collaborative Learning Environments, Navigation Strategies and Comprehension, Mobile Learning, Quality Issues of Distance Learning Processes, Knowledge Management and E learning, Learning Technologies for Primary and Secondary Schools, Educational System for People with Special Needs.
