The Lords of Creation Frederick Lewis Allen,2014-06-10 A stimulating account of the capitalists who changed America in the late 19th and early 20th centuries setting the stage for the 1929 crash and Great Depression Kirkus Reviews In the decades following the Civil War America entered an era of unprecedented corporate expansion with ultimate financial power in the hands of a few wealthy industrialists who exploited the system for everything it was worth The Rockefellers Fords Morgans and Vanderbilts were the lords of creation who along with like minded magnates controlled the economic destiny of the country unrestrained by regulations or moral imperatives Through a combination of foresight ingenuity ruthlessness and greed America s giants of industry remolded the US economy in their own image They established their power and authority ensuring that they and they alone would control the means of production transportation energy and commerce creating the conditions for the stock market collapse of 1929 and the Great Depression that followed As modern society continues to be affected by wealth inequality and cycles of boom and bust it s as important as ever to understand the origins of financial disaster and the policies practices and people who bring them on The Lords of Creation first published when the catastrophe of the 1930s was still painfully fresh is a fascinating story of bankers railroad tycoons steel magnates speculators scoundrels and robber barons It is a tale of innovation and shocking exploitation and a sobering reminder that history can indeed repeat itself

Lords of Creation ,1883

The Lord of History Jean Daniélou,1958 Maintains that history makes sense only when understood as the history of salvation Shows how the very possibility of history as distinct from chronicle arises from

the revealed knowledge of God's creative work Christ as God entering history becomes its centre and both judges and illumines it with consequences for all past and present philosophies With Christ as norm the author examines Marxism logical positivism existentialism and other secular interpretations of history and distinguishes between their valid and false concepts Then after searching exposition of the Christian theology of history in which God's presence is continuous he concludes with a section explaining how the Christian in a sense not only experiences history but makes it More than an answer for the anxious and a refutation of those who see Christianity simply as one historical stream among many this book is a commanding invitation for all mankind to take part in history to participate individually and collectively in the work of salvation
