Abstract

Does economic development lead to political democracy? Or does political democracy generate economic development? Through reviewing literature of political economy of development, this study attempts to show audience at least five possible patterns and theoretical explanations of the connections between development and democracy. They are: 1) development first, democracy later, also modernization theory, 2) political change process, 3) development not leads to democracy, 4) democracy first, development later, and 5) democracy not matters in development. Furthermore, I point out that in the process of democratization economic development varies from stage to stage: it declines in the early phase, but increases in the later; investigating economic change corresponding to political transition is critical to reconsider the causality between development and democracy. Lastly, I conclude that the controversy over development and democracy is inconclusive and will be continuing.

I. Introduction

Would economic development lead to democracy or democracy generate economic development? The primary purpose of this paper is to show audience that there should be at least five theoretical patterns of the causality between development and democracy. Through reviewing literature related to the sequence of economic development and democracy in the process of democratization in developing countries, basically, at least, there are five possible theoretical models arguing the issue of the priority of development and democracy: First, modernizationists, such as Seymour Lipset,

Building the Resilience of Small States Denny Lewis-Bynoe, 2014-09-08 Some small states enjoy relatively high GDP per capita giving the impression of economic strength when in reality these economies are fragile and disproportionately affected by adverse economic shocks natural disasters and extreme weather events The Commonwealth resilience framework has been developed to identify both the national policies required to build resilience and the areas in which regional and international development partners can provide support This study refines and expands the framework to cover areas such as governance environmental management and social development It proposes policy measures for building resilience and ways in which the resilience framework for small states can be embedded in national planning to help stakeholders to agree priority areas for policy intervention

East Asian Development Model Shipping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government

guidance and export led economies were often cited as contributors to the impressive growth. However major changes have taken place in Asia on and around the turn of the century. Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States. Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century. And if so what is it. This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model. The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times. This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies.
