Math Magic for Your Kids Scott Flansburg, 1997-01-15 Learning math can be a difficult task for any child and for many adults. But learning to work with numbers need not be a dreaded experience. In fact, it can even be fun. Scott Flansburg, also known as the Human Calculator, can help kids learn how to add, subtract, multiply, and divide without the anxiety and frustration which often accompanies learning these skills. Using techniques that make numbers easy to work with and by demonstrating how math is essential to everyday life, contrary to the lament of a great percentage of students, Math Magic for Your Kids can help maximize your child's potential to understand math and enjoy it in the process. Flansburg has helped millions of math-phobic adults with his popular lectures and best-selling book Math Magic. Now he is reaching out to help America's math-phobic kids. Math Magic for Your Kids makes it easy even for those adults who suffer from math anxiety to help the next generation get a leg up on essential math skills. The book is specifically designed to be combined with various mathematics curricula approved by the National Council of Teachers of Mathematics. Aimed at children aged 5 through 8, it can also benefit younger children who demonstrate a readiness for advanced number concepts and for older children who need reinforcement of basic math skills. For kids who struggle with simple math skills, Flansburg provides activities to build a child's math sense and help reinforce math concepts. Math Magic for Your Kids also contains information and anecdotes that relate math concepts to everyday situations, explains principles that facilitate learning in general, and provides shortcut methods as well as challenging puzzles and riddles to keep kids interested and involved. Games and exercises are designed to be executed independently or with parents' help.

Mental Math - Become a Human Calculator Matthew Hicks, 2018-05-23 Have you encountered any of those 2nd grade math problems online that 50% of adults allegedly can't solve? It's sad, but that estimation is usually correct. It's been so long since most of us were in school that we often forget even basic math, let alone advanced mathematics. The good thing is that you can still reintroduce math into your life and learn some cool mental calculator tricks. You don't need to be a math genius to simply learn math again and find out how you can apply it to your daily activities. Become a human calculator with this mental math guide.

Math Magic Scott Flansburg, Victoria Hay, 2015-06-16 National Bestseller Tricks for performing accurate mental calculations and fun alternate approaches to common math class difficulties. Library Journal

Millions of otherwise successful adults are afraid to balance their checkbooks and don't know how to figure interest on savings or credit. Millions of students dread their math classes and live in fear of the math section of the SAT. But as Scott Flansburg, the human calculator, demonstrates in this revised edition, anyone can put these phobias to rest and deal with essential everyday mathematical calculations with confidence.

Master the basics: The real way addition, subtraction, multiplication, and division work. Simplify calculations through estimation. Quick check your answers. Convert metric measures to more familiar ones. Figure tips, taxes, and percentages and never get shortchanged again.

Mental Math Abhishek VR, 2019-05-19

Discover the Mental Math Secrets to Become a Human Calculator. Schools taught you a way to do math that works when you have a pen and paper. But the same method takes a lot of effort when you have to do math in your head. This is because it uses a lot of your working memory, the short-term memory used to complete a mental task. For example, try to mentally multiply 73201×3 . It might take only a few seconds to multiply the individual digits. But if you multiply right to left the way you learnt in school, you will rely on your working memory. You will use it to recall every single digit you calculate to put it back together and get your final answer. You may even find yourself calculating some digits again because you forgot one of the numbers. The difficulty increases further when you have to multiply larger numbers like 732×323 . You will have to remember numbers across many steps. Mental arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers. In school, you learnt to write down numbers as you calculate to free up your working memory. In mental math, there are many other ways to do the same thing. One of the tricks to free up your working memory is to calculate from left to right instead of right to left. Try multiplying 73201×3 from left to right, starting from 7×3 and ending with 1×3 . You will find yourself calling out the answer before you even finish the whole problem. You can use this trick to solve any math problem in the future. But we have just scratched the surface. There are many more tricks inside the book that make doing mental math as easy as reading a comic. Here is a glimpse of what you will be able to master: Mentally add large numbers. Example: Add 87395492 in your head in seconds. Subtract numbers fast. Example: Mentally subtract 75204998 without writing anything down. Multiplication tricks to multiply three-digit numbers. Example: Multiply 323×123 in your head. Square large numbers in seconds. Example: Calculate 64×64 faster than a calculator. Mentally divide large numbers. Example: Divide 601324 by 73 entirely in your head. Quickly check a calculation with 90% accuracy without recalculating. Overcome math anxiety. Cement your mental math skills with bonus weekly training. This book only has the best techniques used by over 27 mental and Vedic math experts across the world. The techniques in this book are so simple you will wonder why nobody taught you this before. You will be able to master it even if you have failed math in school. Imagine waking up tomorrow being able to do lightning-fast math in your head. Your family and friends will look at you like you are some kind of a genius. Since you do the calculations in your head, you will acquire better mental habits in the process. So you will not just look like a genius; you will actually be one.
