Medicinal and Aromatic Plants Tariq Aftab, Khalid Rehman Hakeem, 2021-03-27 Before the concept of history began humans undoubtedly acquired life benefits by discovering medicinal and aromatic plants MAPs that were food and medicine Today a variety of available herbs and spices are used and enjoyed throughout the world and continue to promote good health The international market is also quite welcoming for MAPs and essential oils The increasing

environment and nature conscious buyers encourage producers to produce high quality essential oils These consumer choices lead to growing preference for organic and herbal based products in the world market As the benefits of medicinal and aromatic plants are recognized these plants will have a special role for humans in the future Until last century the production of botanicals relies to a large degree on wild collection However the increasing commercial collection largely unmonitored trade and habitat loss lead to an incomparably growing pressure on plant populations in the wild Therefore medicinal and aromatic plants are of high priority for conservation Given the above we bring forth a comprehensive volume Medicinal and Aromatic Plants Healthcare and Industrial Applications highlighting the various healthcare industrial and pharmaceutical applications that are being used on these immensely important MAPs and its future prospects This collection of chapters from the different areas dealing with MAPs caters to the need of all those who are working or have interest in the above topic

Secondary Metabolites Based Green Synthesis of Nanomaterials and Their Applications Azamal Husen,2023-05-02 Nanotechnology is gaining importance in every field of science and technology Green synthesis of nanomaterials involves the use of microorganisms such as bacteria fungi viruses and different lower and higher plants Green synthesis of nanomaterials from plant extracts becoming popular in comparison to synthesis using microorganisms Plant based nanomaterials synthesis is easy have no need to bring back from the culture medium and is safe Additionally plant based nanomaterials are eco friendly in comparison to physical and chemical modes of synthesis Several lower and higher plants are rich in terms of secondary metabolites These metabolites have been used as medicine in crude extract form or with some other formulations They have been also used to isolate the bioactive compounds in modern

medicine as well as in herbal medicine systems Thus phytochemicals present in the plant and their parts play an important role in nanomaterials synthesis mainly due to the presence of a significant number of secondary metabolites for instance alkaloids flavonoids saponins steroids tannins etc Further essential and aromatic oils have been also explored for nanomaterials synthesis and they are also equally useful in terms of their various biological applications These organic ingredients come from a wide range of plant components such as leaves stems roots shoots flowers bark and seeds Globally the presence of different plants has shown a capability to produce huge and diverse groups of secondary metabolites The functional groups present in the plant extract acts as capping and stabilizing agent Most of the time pure isolated bioactive compounds are more biologically active hence scholars are focusing their research on the synthesis of nanomaterials using some particular class of secondary metabolites Investigations have shown that the green synthesized nanomaterials were found to be more biologically active in comparison to chemically synthesized nanomaterials These nanomaterials and or nanocomposites found different applications especially in drug delivery detection and cure of cancer cells diagnosis of a genetic disorder photoimaging and angiogenesis detection They have also shown several applications in agricultural horticultural as well as forestry sectors The book in hand covers a wide range of topics as mentioned above It incorporates chapters that the authors have skilfully crafted with clarity and precision reviewing up to date literature with lucid illustrations The book would cater to the need of graduate students as a textbook and simultaneously be useful for both novices and experienced scientists and or researchers working in the discipline of nanotechnology nanomedicine medicinal plants plant science economic botany chemistry biotechnology pharmacognosy pharmaceuticals industrial chemistry and many other interdisciplinary subjects It should also inspire industrialists and policy makers associated with plant based nano products
