Scheckel,2013-01-01 Discusses renewable energy resources and provides instructions for creating energy saving and energy producing equipment Biofuel Production Technologies: Critical Analysis for Sustainability Neha Srivastava,Manish Srivastava,P. K. Mishra,Vijai Kumar Gupta,2020-03-23 Production and utilization of sustainable energy toward maintaining a clean environment is a major challenge At the same time the continued depletion of fossil fuels and the global dependency on non renewable fuels is a chief concern Moreover the long term economic and environmental issues associated with the high utilization of fossil fuel such as global warming are also important particularly in the context of the predicted increase in the global population to around 5 billion by 2050 In recent years researchers have been investigating alternative renewable fuels to replace fossil fuels Of the various options biofuels are especially attractive due to their low production costs and the fact that they are pollution free Also known as transportation fuels their energy is derived from biological resources or through the biological processes Biofuels such as biohydrogen biomethane biogas ethanol and butanol offer a number of advantages and can be economically produced from cellulosic biomass As such they can play a vital role in sustainably meeting future energy demands Biofuels have the potential to become a global primary energy source offering significant reductions in greenhouse gas emissions as well as opportunities to increase economic and social development in rural communities and reduce the problems associated with waste disposal However low yields and lack of process technology are some of the aspects that need to be addressed This book offers an overview of existing biofuels and the technologies to solve the problems associated with their practical implementation Evaluating the biofuel options and discussing the opportunities and risks in relation to resources technologies practices markets and policy it provides insights into the development of economically viable bioenergy industries Fixed Dome Biogas Plants V.
