**Introduction to Embedded Systems** Manuel Jimenez, Rogelio Palomera, Isidoro Couvertier, 2013-09-30 *Embedded Systems Interfacing for Engineers using the Freescale HCS08 Microcontroller I* Douglas Summerville, 2009-10-08. This textbook provides practicing scientists and engineers an advanced treatment of the Atmel AVR microcontroller. This book is intended as a follow on to a previously published book titled Atmel AVR Microcontroller Primer: Programming and Interfacing. Some of the content from this earlier text is retained for completeness. This book will emphasize advanced programming and interfacing skills. We focus on system level design consisting of several interacting microcontroller subsystems. The first chapter discusses the system design process. Our approach is to provide the skills to quickly get up to speed to operate the internationally popular Atmel AVR microcontroller line by developing systems level design skills. We use the Atmel ATmega164 as a representative sample of the AVR line. The knowledge you gain on this microcontroller can be easily translated to every other microcontroller in the AVR line. In succeeding chapters we cover the main subsystems aboard the microcontroller providing a short theory section followed by a description of the related microcontroller subsystem with accompanying software for the subsystem. We then provide advanced examples exercising some of the features discussed. In all examples we use the C programming language. The code provided can be readily adapted to the wide variety of compilers available for the Atmel AVR microcontroller line. We also include a chapter describing how to interface the microcontroller to a wide variety of input and output devices. The book concludes with several detailed system level design examples employing the Atmel AVR microcontroller.

Table of Contents: Embedded Systems Design, Atmel AVR Architecture Overview, Serial Communication Subsystem, Analog to Digital Conversion, ADC, Interrupt Subsystem, Timing Subsystem, Atmel AVR Operating Parameters and Interfacing, System Level Design.
