The Textbook as Discourse Eugene F. Provenzo, Jr., Annis N. Shaver, Manuel Bello, 2011-01-24. This book is about the social, political, and cultural content of elementary and secondary textbooks in American education. It focuses on the nature of the discourses, the content, and context that represent what is included in textbooks.

**Standard Catalog for High School Libraries**, 1929. The 1st ed. accompanied by a list of Library of Congress card numbers for books, except fiction, pamphlets, etc. which are included in the 1st ed. and its supplement 1926-29.

**Representations of Nature of Science in School Science Textbooks** Christine V. McDonald, Fouad Abd-El-Khalick, 2017-04-21. Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provides a global perspective on NOS from elementary to college level and discusses the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks. This comprehensive analysis is a definitive reference work for the field of science education.

Critical Analysis of Science Textbooks Myint Swe Khine, 2013-06-26. The critical analysis of science textbooks is vital in improving teaching and learning at all levels in the subject and this volume sets out a range of academic perspectives on how that analysis should be done. Each chapter focuses on an aspect of science textbook appraisal with coverage of everything from theoretical and philosophical underpinnings, methodological issues, and conceptual frameworks for critical analysis to practical techniques for evaluation. Contributions from many of the most distinguished scholars in the field give this collection its sure-footed contemporary relevance, reflecting the international standards of UNESCO as well as leading research organizations such as the American Association for the Advancement of Science whose Project 2061 is an influential waypoint in developing protocols for textbook analysis. Thus the book shows how to gauge aspects of textbooks such as their treatment of controversial issues, graphical depictions, scientific historiography, vocabulary usage, accuracy, and readability. The content also covers broader social themes such as the portrayal of women and minorities. Despite newer, more active pedagogies

textbooks continue to have a strong presence in classrooms and to embody students socio historical inheritance in science Despite their ubiquitous presence they have received relatively little on going empirical study It is imperative that we understand how textbooks influence science learning This book presents a welcome and much needed analysis Tina A Grotzer Harvard University Cambridge Massachusetts USA The present book provides a much needed survey of the current state of research into science textbooks and offers a widerange of perspectives to inform the science of writing better science textbooks Keith S Taber University of Cambridge Cambridge United Kingdom

**Analyzing Communication** Wolff-Michael Roth,Pei-Ling Hsu,2010-01-01 The collection of data sources in the social sciences involves communication in one form or another between research participants who are observed while communicating or between researcher and researched who communicate so that the former can learn about from the latter How does one analyze communication In particular how does one learn to analyze data sources established in and about communication In response to these questions the authors provide insights into the laboratory of social science research concerned with the analysis of communication in all of its forms including language gestures images and prosody Writing in the spirit of Bourdieu and his recommendations for the transmission of a scientific habitus the authors allow readers to follow

their social science research in the making Thus each chapter focuses on a particular topic identity motivation knowing interaction and exhibits how to go about researching it How to set up research projects how to collect data sources how to find research questions and how to do many other practical things to succeed The authors comment on excerpts from the findings of between 2 and 4 published studies to describe how to write and publish research how to address audiences which decisions they have made which alternative approaches there might exist and many other useful recommendations for data analysis and paper publishing In the end the authors actually follow an expert social scientist as he analyzes data in real time in front of an audience of graduate students The entire book therefore constitutes something like a journey into the kitchen of an experienced chef who gives advice in the process of cooking
