Macroeconomic Policy Modelling for Developing Countries Victor Murinde,1993

How can developing countries design a macroeconomic policy framework that will reverse the current trend of persistent inflation regressive real growth and foreign exchange bottlenecks One plausible answer emerges from an intersection between the dilemma and a novel analytical approach In this book Victor Murinde develops one novel approach by drawing on the first principles of economic theory to construct a macroeconomic model such that the structural features and bottlenecks of a developing country are integrally incorporated The model is small and congruent with the limited available data but it is comprehensive enough to address the key policy instruments and targets A battery of modern econometric techniques are called upon to estimate and test the model on Kenya Tanzania and Uganda since

independence in a country specific as well as cross country spirit Policy experiments are performed to highlight the macroeconomic scenario generated each time a policy instrument or a stabilization policy package is implemented The experiments fully demonstrate the practicability of the small model limited data methodology developed in the book
