A Handbook of Spatial Research Paradigms and Methodologies: Spatial cognition in the child and adult Nigel Foreman, Raphael Gillett, 1997 Spatial cognition is a broad field of inquiry emerging from a wide range of disciplines and incorporating a wide variety of paradigms that have been employed with human and animal subjects The contributing authors in both volumes of this Handbook are highly respected international authorities in their fields with many years of experience who describe and review the major paradigms used in their research area Volume 1 is concerned with the developing infant child and adult and their use of spatial representations to search among multiple spatial locations make spatial judgments and find their way from place to place in laboratory environments built environments and in virtual reality simulations

*Handbook of Behavioral and Cognitive Geography* Daniel R. Montello, 2018-04-27 This comprehensive Handbook summarizes existing work and presents new concepts and empirical results from leading scholars in the multidisciplinary field of behavioral and cognitive geography the study of the human mind and activity in and concerning space place and environment It provides the broadest and most inclusive coverage of the field so far including work relevant to human geography cartography and geographic information science

Human Spatial Cognition and Experience Toru Ishikawa, 2020-06-15 This book offers students an introduction to human spatial cognition and experience and is designed for graduate and advanced undergraduate students who are interested in the study of maps in the head and the psychology of space We live in space and space surrounds us We interact with space all the time consciously or unconsciously and make decisions and actions based on our perceptions of that space Have you ever wondered how some people navigate perfectly using maps in their heads while other people get lost even with a physical map

What do you mean when you say you have a poor sense of direction How do we know where we are How do we use and represent information about space This book clarifies that our knowledge and feelings emerge as a consequence of our interactions with the surrounding space and show that the knowledge and feelings direct guide or limit our spatial behavior and experience Space matters or more specifically space we perceive matters Research into spatial cognition and experience asking fundamental questions about how and why space and spatiality matters to humans has thus attracted attention It is no coincidence that the 2014 Nobel Prize in Physiology or Medicine was awarded for research into a positioning system in the brain or inner GPS and that spatial information and technology are recognized as an important social infrastructure in recent years This is the first book aimed at graduate and advanced undergraduate students pursuing this fascinating area of research The content introduces the reader to the field of spatial cognition and experience with a series of chapters covering theoretical empirical and practical issues including cognitive maps spatial orientation spatial ability and thinking geospatial information navigation assistance and environmental aesthetics

The Cambridge Handbook of Visuospatial Thinking Priti Shah,Akira Miyake,2005-07-25 The ability to navigate across town comprehend an animated display of the functioning of the human heart view complex multivariate data on a company s website or to read an architectural blueprint and form a three dimensional mental picture of a house are all tasks involving visuospatial thinking The field of visuospatial thinking is a relatively diverse interdisciplinary research enterprise An understanding of visuospatial thinking and in particular how people represent and process visual and spatial information is relevant not only to cognitive psychology but also education geography architecture medicine design computer science artificial intelligence semiotics and animal cognition The goal of this book first published in 2005 is to present a broad overview of research on visuospatial thinking that can be used by researchers as well as students interested in this topic in both basic research and applied naturalistic contexts

Handbook Of Spatial Research Paradigms And Methodologies Nigel Foreman,Raphael Gillett,2013-01-11 Spatial cognition is a broad field of enquiry emerging from a wide range of disciplines and incorporating a wide variety of paradigms that have been employed with human and animal subjects This volume is part of a two volume handbook reviewing the major paradigms used in each of the contributors research areas This volume considers the issues of neurophysiological aspects of spatial cognition the assessment of cognitive spatial deficits arising from neural damage in humans and animals and the observation of spatial behaviours in animals in their natural habitats This handbook should be of interest to new and old students alike The student new to spatial research can be brought up to speed with a particular range of techniques made aware of the background and pitfalls of particular approaches and directed toward useful sources For seasoned researchers the handbook provides a rapid scan of the available tools that they might wish to consider as alternatives when wishing to answer a particular spatial research problem

The Oxford Handbook of Developmental Psychology, Vol. 1 Philip David Zelazo,2013-01-15 Research in developmental psychology which examines the history origins and causes of behavior and age

related changes in behavior seeks to construct a complex multi level characterization of behavior as it unfolds in time across a range of time scales from the milliseconds of reaction time to the days and weeks of childhood the decades of the human lifespan and even beyond to multiple generations Behavior in this view is embedded within what is essentially a dynamic system of relations extending deep within individuals Thorough and engaging this handbook explores the impact of this research on what is now known about psychological development from birth to biological maturity and it highlights the extent to which the most cutting edge developmental science reflects a new kind of intellectual synthesis one that reveals how cultural social cognitive neural and molecular processes work together to yield human behavior and changes in human behavior With insightful contributions from more than 50 of the world s leading developmental scientists these two volumes will serve as an influential and informed text for students and as an authoritative desk reference for years to come
