

A sunset scene with a silhouette of a person carrying a surfboard on their shoulder. The sky is filled with horizontal, wavy clouds in shades of orange, red, and yellow. The sun is a bright yellow orb on the horizon, partially obscured by the person's silhouette. The person is standing on a dark, flat surface, possibly a beach or a pier.

*Physical Science: a Systematic Approach* Francis W. McCarthy, Joan H. Brenner, Maurice Temple, 1972      The Neutron and the Bomb: A Biography of Sir James Chadwick Andrew Brown, 2019-08-15 James Chadwick 1891 1974 came from a humble background his father was a cotton spinner He was accepted in the physics department of Sir Ernest Rutherford at Manchester University in 1908 on a scholarship and soon started publishing new findings about radioactivity This led to a traveling scholarship to Berlin where he made the important discovery of the continuous spectrum of particles When the World War I broke out Chadwick was interned by the Germans as an enemy alien for the next four years but continued experiments in the prison camp On his return to England in broken health Rutherford invited Chadwick to join the Cavendish Laboratory in Cambridge where he became Rutherford's deputy and oversaw much groundbreaking physics research over the next 15 years Chadwick concentrated on finding evidence for the neutron an uncharged nuclear particle whose existence was first proposed by Rutherford in 1920 Having noticed anomalous results from the Curie laboratory in Paris in 1932 Chadwick used simple bench top apparatus to convince himself after weeks of intense observations that he had definite evidence for the existence of the neutron The Nobel Prize for physics followed in 1935 that year he moved to Liverpool University to head his own department At the outbreak of World War II the feasibility of atomic bombs of unprecedented explosive power was already being discussed Chadwick drafted the British MAUD committee's historic reports in the summer of 1941 which concluded that atomic bombs were indeed feasible with sufficient industrial capacity In wartime Britain this was impossible but in 1943 Chadwick moved to the US as head of the British scientists working on the Manhattan Project He formed an unlikely alliance with its leader General Leslie Groves and became an adroit scientist diplomat Witnessing the first explosion of a plutonium fueled device at the Trinity Test shattered him Chadwick believed that dropping atomic bombs on Japanese cities was justified but the development of nuclear weapons as an unintended consequence of his discovery of the neutron caused him deep personal anguish Until this excellent book by Andrew Brown Chadwick has remained the most shadowy of the atomic scientists who for better or worse gave the human species mastery over nuclear energy Nigel Calder *New Scientist* Andrew Brown's biography beautifully reveals Chadwick's scientific diplomatic and personal achievements Roger H Stuewer *Physics Today* I can warmly recommend this book to all interested in the life of a remarkable scientist who played a crucial role in a formative period of the modern world Hermann Bondi *Times Higher Education Supplement* This is the biography of a physicist who made one of the most important discoveries in nuclear physics but retained to his old age the shyness of a young lad Andrew Brown takes us through Chadwick's life as an adventure I found it a very good read Hans Bethe *American Journal of Physics* The tale of so sterling a character even when told as well as in this book may be a little

short on light moments but any reader interested in the evolution of physics from an academic passion to a leading role on the world stage will find it a fascinating story and a worthy tribute to a great scientist Brian Pippard Nature makes absorbing reading more than the life story of a remarkable man unfolds the tremendous transformation that science underwent in the 20th century Joseph Rotblat avidly researched and artfully written This biography blends elegantly direct scientific descriptions with often witty episodes and character summaries William Lanouette Bulletin of the Atomic Scientists

*Introduction to Optics* Frank L. Pedrotti, Leno M. Pedrotti, Leno S. field theorists string theorists condensed matter physicists and statistical mechanics Secondly to expose young researchers to the recent advances in various areas of theoretical physics where the concepts of extended objects geometry and fluctuations are currently playing an important role Courses included an introduction to the problem of random paths in disordered media theoretical and numerical approaches to quantized geometries from random paths to surfaces strings to four dimensional gravity physics of amphiphilic membranes and the models of random surfaces used to describe them defects in various physical systems recent developments on the formulation of two dimensional gauge theories as string theories Problems of condensed matter physics were surveyed and a seminar on the renor

**Future Stories** David Christian, 2022-06-07 The New York Times bestselling author of *Origin Story* who Bill Gates has long been a fan of turns his attention to the future of humanity and how we think about it in this ambitious book *The future is uncertain* a bit spooky possibly dangerous maybe wonderful We cope with this never ending uncertainty by telling stories about the future future stories How do we construct those stories Where is the future the place where we set those stories Can we trust our future stories And what sort of futures do they show us This book is about future stories and future thinking about how we prepare for the future Think of it as a sort of User's Guide to the Future We all need such a guide because the future is where we will spend the rest of our lives David Christian historian and author of *Origin Story* is renowned for pioneering the emerging discipline of Big History which surveys the whole of the past But with *Future Stories* he casts his sharp analytical eye forward offering an introduction to the strange world of the future and a guide to what we think we know about it at all scales from the individual to the cosmological Christian consults theologians philosophers scientists statisticians and scholars from a huge range of places and times as he explores how we prepare for uncertain futures including the future of human evolution artificial intelligence interstellar travel and more By linking the study of the past much more closely to the study of the future we can begin to imagine what the world will look like in a hundred years and consider solutions to the biggest challenges facing us all
