Elliott,2019-08-08 This second edition of Precast Concrete Structures introduces the conceptual design ideas for the prefabrication of concrete structures and presents a number of worked examples that translate designs from BS 8110 to Eurocode EC2 before going into the detail of the design manufacture and construction of precast concrete multi storey buildings Detailed structural analysis of precast concrete and its use is provided and some details are presented of recent precast skeletal frames of up to forty storeys The theory is supported by numerous worked examples to Eurocodes and European Product Standards for precast reinforced and prestressed concrete elements composite construction joints and connections and frame stability together with extensive specifications for precast concrete structures The book is extensively illustrated with over 500 photographs and line drawings *Eurocode 2: Design of Concrete Structures* ,2011 **Design in Modular Construction** Mark Lawson,Ray Ogden,Chris Goodier,2014-02-24 Modular construction can dramatically improve efficiency in construction through factory production of pre engineered building units and their delivery to the site either as entire buildings or as substantial elements The required technology and application are developing rapidly but design is still in its infancy Good design requires a knowledge of modular production installation and interface issues and also an understanding of the economics and client related benefits which influence design decisions Looking at eight recent projects along with background information this guide gives you coverage of generic types of module and their application vertical loading stability and robustness dimensional and spacial planning hybrid construction cladding services and building physics fire safety and thermal and acoustic performance logistical aspects such as transport tolerances and safe installation A valuable guide for professionals and a thorough introduction for advanced students **Eurocode 2 - Design of Concrete Structures** ,1992 **Quality Function Deployment for Buildable and Sustainable Construction** Singhaputtangkul Natee,Sui Pheng Low,Evelyn A. assessment of building envelope materials and designs for high rise residential buildings in Singapore in the early design stage The book provides the reader with a conceptual framework for understanding the development of the KBDSS QFD tool The framework is presented in a generalized form in order to benefit building professionals decision makers analysts academics and researchers who can use the findings as guiding principles to achieve optimal solutions and boost efficiency
