fields *The Big Data-Driven Business* Russell Glass, Sean Callahan, 2014-11-24 Get the expert perspective and practical advice on big data The Big Data Driven Business How to Use Big Data to Win Customers Beat Competitors and Boost Profits makes the case that big data is for real and more than just big hype The book uses real life examples from Nate Silver to Copernicus and Apple to Blackberry to demonstrate how the winners of the future will use big data to seek the truth Written by a marketing journalist and the CEO of a multi million dollar B2B marketing platform that reaches more than 90% of the U S business population this book is a comprehensive and accessible guide on how to win customers beat competitors and boost the bottom line with big data The marketplace has entered an era where the customer holds all the cards With unprecedented choice in both the consumer world and the B2B world it s imperative that businesses gain a greater understanding of their customers and prospects Big data is the key to this insight because it provides a comprehensive view of a company s customers who they are and who they may be tomorrow The Big Data Driven Business is a complete guide to the future of business as seen through the lens of big data with expert advice on real world applications Learn what big data is and how it will transform the enterprise Explore why major corporations are betting their companies on marketing technology Read case studies of big data winners and losers Discover how to change privacy and security and remodel marketing Better information allows for better decisions better targeting and better reach Big data has become an indispensable tool for the most effective marketers in the business and it s becoming less of a competitive advantage and more like an industry standard Remaining relevant as the marketplace evolves requires a full understanding and application of big data and The Big Data Driven Business provides the practical guidance businesses need **Big Data Analytics** Kalvis Saulespurs, In the span of a single human generation we have witnessed the most profound transformation in how information is created stored and utilized since the invention of the printing press Every second humanity generates approximately 2.5 quintillion bytes of data a number so astronomical that it defies comprehension To put this in perspective if each byte were a grain of sand we would create enough data every day to fill the entire Sahara Desert several times over This deluge of information which we have come to call big data represents both the greatest opportunity and the most daunting challenge facing organizations in the twenty first century The genesis of this data explosion can be traced to several converging technological forces The proliferation of internet connected devices from smartphones to smart refrigerators has created a vast network of sensors continuously monitoring and recording human behavior Social media platforms have transformed personal expression into quantifiable metrics capturing not just what we say but when we say it to whom and with what emotional undertones Financial transactions once limited to physical currency exchanges now leave digital footprints that reveal intricate patterns of consumer behavior and economic activity Meanwhile advances in cloud computing have made it economically feasible to store and process volumes of data that would have been unthinkable just a decade ago Yet for all the promise that big data holds the reality for most organizations is far more sobering Despite investing billions of

dollars in data infrastructure analytics platforms and specialized personnel the majority of companies struggle to extract meaningful value from their data assets Studies consistently show that less than twenty percent of collected data is ever analyzed and even less translates into actionable business insights This phenomenon which some researchers have termed the data paradox reveals a fundamental disconnect between our capacity to generate information and our ability to transform it into competitive advantage
