Johnston Cobb, Kate Scully, 2012-02-12 Colour is a powerful selling tool It is the first thing to catch the consumer's eye in the shop window Get the colour choice wrong and an entire range can stay on the racks So how do colours arrive on the catwalk or the sales floor and why do different companies all seem to choose similar colours each season The answer lies in the work of the huge colour forecasting industry With case studies that show the industry at work this book breaks down the forecasting process from how to put together a colour palette to colour theory and the way that colours behave and helps you to build the combination of research and intuitive skills that a successful designer or forecaster needs **Dressing the**
