Abhishek Singh,Karthik Ramasubramanian,Shrey Shivam

Development Examples For Entrepreneurs 46 2604 Chatbot Development:

Microsoft Conversational AI Platform for Developers Stephan Bisser,2021 Build a chatbot using the Microsoft Conversational AI platform This book will teach you step by step how to save time and money by including chatbots in your enterprise s strategy You will learn how to be proficient at every phase of development from collaboration on a chatbot in an end to end scenario to the first mock up phase and on through to the deployment and evaluation phases Microsoft built a cloud service ecosystem for running artificial intelligence workloads in public cloud scenarios and a robust AI platform that offers a broad range of services targeting conversational artificial intelligence solutions such as chatbots Building a chatbot requires not just developer coding skills but special considerations including input from business stakeholders such as domain matter experts and power users You will learn by example how to use a great set of tools and services to bridge the gap between business and engineering You will learn how to successfully morph business requirements into actionable IT and engineering requirements You will learn about Bot Framework Composer which allows power users to initiate the building of a chatbot that can then be handed over to the development team to add capabilities through code Coverage is given to the process of sharing implementation tasks and workloads between power users who are using a low code or no code approach and developers who are building out the enhanced features for the chatbot What You Will Learn Understand Microsoft s comprehensive AI ecosystem and its services and solutions Recognize which solutions and services should be applied in each business scenario Discover no code low code approaches for building chatbots Develop chatbots using the conversational AI stack Align business and development for improved chatbot outcomes and reduced time to market This book is for developers and power users who want to build chatbots An understanding of the core principles of writing code NET or JavaScript for modern web applications is expected Stephan Bisser is a technical lead at Solvion and a Microsoft MVP for artificial intelligence In his current role he focuses on conversational AI Microsoft 365 and Azure He is passionate about the conversational AI platform and the cognitive services ecosystem Stephan and several other MVPs founded BotBuilderCommunity and SelectedTech community initiatives that focus on bot framework SDKs tools and tech topics related to Microsoft 365 and AI **Building an Enterprise Chatbot** Abhishek Singh,Karthik Ramasubramanian,Shrey Shivam,2019-09-13 Explore the adoption of chatbots in business by focusing on the design deployment and continuous improvement of chatbots in a business with a single use case from the banking and insurance sector This book starts by identifying the business processes in the banking and insurance industry This involves data collection from sources such as conversations from customer service centers online chats emails and other NLP sources You ll then design the solution architecture of the chatbot Once the architecture is framed the author goes on to explain natural language understanding NLU natural language processing NLP and natural language generation NLG with examples In the next sections you ll design and implement the backend framework of a typical chatbot from scratch You will also explore some popular open source

chatbot frameworks such as Dialogflow and LUIS The authors then explain how you can integrate various third party services and enterprise databases with the custom chatbot framework In the final section you ll discuss how to deploy the custom chatbot framework on the AWS cloud By the end of Building an Enterprise Chatbot you will be able to design and develop an enterprise ready conversational chatbot using an open source development platform to serve the end user What You Will Learn Identify business processes where chatbots could be used Focus on building a chatbot for one industry and one use case rather than building a ubiquitous and generic chatbot Design the solution architecture for a chatbot Integrate chatbots with internal data sources using APIs Discover the differences between natural language understanding NLU natural language processing NLP and natural language generation NLG Work with deployment and continuous improvement through representational learning Who This Book Is ForData scientists and enterprise architects who are currently looking to deploy chatbot solutions to their business
