Ronan, 1978 Three previous volumes of this series by Colin Ronan are each available in hardback as well as paperback Volume I introduces the reader to the country of China its history geography and language The major part of this book is devoted to the history of scientific thought in China itself In Volume II the first section deals with mathematics and this is followed by a section dealing with mathematics Then follow sections on astronomy meteorology and the earth sciences The volume closes with a description of various aspects of Chinese physics Volume III looks in some detail at one of the greatest contributions the Chinese made to physics the discovery of the magnetic compass [The Shorter Science and Civilisation in China: Vol. 3 and a section of vol. 4, pt. 1 of the major series](#) Joseph Needham, 1978 **The Shorter Science and Civilisation in China: Vol. 3 and a section of vol. 4, pt. 1 of the major series** Joseph Needham, 1978 [Science and Civilisation in China](#) Joseph Needham, 1965 **The Shorter Science and Civilisation in China: Volume 3** Joseph Needham, Colin A. Ronan, 1978 A section of Volume IV part 1 and a section of Volume IV part 3 of the major series **The Shorter Science and Civilisation in China: The main sections of vol. 4, pt. 2 of the major series** Joseph Needham, 1978 **The Shorter Science and Civilisation in China: Volume 5** Joseph Needham, Colin A. Ronan, 1978 This fifth volume abridgement of Joseph Needham's monumental work is concerned with the staggering civil engineering feats made in early and medieval China **The Shorter Science and Civilisation in China: Contains the first section of volume IV, part 3, and the final section of volume IV, part 2 of the major series** Joseph Needham, 1978 **The Shorter Science and Civilisation in China: Vol. 4, pt. 1 and a section of vol. 4, pt. 3 of the major series** Joseph Needham, 1978 [The Shorter Science and Civilisation in China: Volume 1](#) Colin A. Ronan, 1978-06-29 Joseph Needham's Science and Civilisation in China is a monumental piece of scholarship which breaks new ground in presenting to the Western reader a detailed and coherent account of the development of science technology and medicine in China from the earliest times until the advent of the Jesuits and the beginnings of modern science in the late seventeenth century It is a vast work necessarily more suited to the scholar and research worker than the general reader This paperback version abridged and re-written by Colin Ronan makes this extremely important study accessible to a wider public The present book covers the material treated in volumes I and II of Dr Needham's original work The reader is introduced to the country of China its history geography and language and an account is given of how scientific knowledge travelled between China and Europe

The major part of the book is then devoted to the history of scientific thought in China itself Beginning with ancient times it describes the milieu in which arose the schools of the Confucians Taoists Mohists Logicians and Legalists We are thus brought on to the fundamental ideas which dominated scientific thinking in the Chinese Middle Ages to the doctrines of the Two Forces Yin and Yang and the Five Elements wu hsing to the impact of the sceptical tradition and Buddhist and Neo Confucian thought

The Shorter Science and Civilisation in China: Volume 5 Colin A. Ronan,1995-09-14 This fifth volume of Colin Ronan s abridgement of Joseph Needham s monumental work is concerned with the remarkable engineering feats made during the early and medieval periods No other country did more in civil engineering both as to scale and skill than China The book opens with an account of the road system which compared favorably with that of the Roman Empire Naturally the Great Wall of China is covered in some detail within the social context of walls which more than any other structure mark the basic features of Chinese communities The Chinese genius for town planning and achievements in hydraulic engineering are covered in later chapters This book provides many clues as to the influence of Chinese innovation on Western engineering trends and will fascinate readers who are interested in the history of science and Chinese civilization

The Shorter Science and Civilisation in China: Vols. 1 and 2 of the major series Joseph Needham,1978 **Science and Civilisation in China: Volume 5, Chemistry and Chemical Technology, Part 7, Military Technology: The Gunpowder Epic** Joseph Needham,1987-01-22 The Gunpowder Epic is one of three planned publications on military technology within Dr Needham s immense undertaking The discovery of gunpowder in China by the 9th century AD was followed by its rapid applications It is now clear that the whole development from bombs and grenades to the invention of the metal barrel hand gun took place in the Chinese culture area before Europeans had any knowledge of the mixture itself Uses in civil engineering and mechanical engineering were equally important before the knowledge of gunpowder spread to Europe in the thirteenth and fourteenth centuries Dr Needham s new work continues to demonstrate the major importance of Chinese science and technology to world history and maintains the tradition of one of the great scholarly works of the twentieth century

The Mechanics of Modernity in Europe and East Asia Erik Ringmar,2004-08-02 This book provides a new answer to the old question of the rise of the west why did some countries embark on a path of sustained economic growth while others stagnated Taking a global view Ringmar investigates the implications of his conclusions on issues facing the developing world today

Art Without Borders Ben-Ami Scharfstein,2009-08-01 People all over the world make art and take pleasure in it and they have done so for millennia But acknowledging that art is a universal part of human experience leads us to some big questions Why does it exist Why do we enjoy it And how do the world s different art traditions relate to art and to each other Art Without Borders is an extraordinary exploration of those questions a profound and personal meditation on the human hunger for art and a dazzling synthesis of the whole range of inquiry into its significance Esteemed thinker Ben Ami Scharfstein s encyclopedic erudition is here brought to bear on the full breadth of the world of art He draws

on neuroscience and psychology to understand the way we both perceive and conceive of art including its resistance to verbal exposition Through examples of work by Indian Chinese European African and Australian artists Art Without Borders probes the distinction between accepting a tradition and defying it through innovation which leads to a consideration of the notion of artistic genius Continuing in this comparative vein Scharfstein examines the mutual influence of European and non European artists Then through a comprehensive evaluation of the world s major art cultures he shows how all of these individual traditions are gradually but haltingly conjoining into a single current of universal art Finally he concludes by looking at the ways empathy and intuition can allow members of one culture to appreciate the art of another Lucid learned and incomparably rich in thought and detail Art Without Borders is a monumental accomplishment on par with the artistic achievements Scharfstein writes about so lovingly in its pages
