Labs of Our Own Sig / Sara Giordano, Sara Giordano, 2025 From climate change to COVID 19 to reproductive justice there has been deep political polarization around science Labs of Our Own provides a unique entry point into these 21st century science wars by focusing on our affective relationships to science The book delves into various sites where scientists teachers artists and activists claim to create more democratic access to science from DIY biology community labs

to feminist classrooms to activist science practitioners The reader will find that these claims for and attempts at democratic sciences not only impact what counts as science and who counts as a scientist but reconfigures who is included in the proper public Instead of arguing for a knee jerk defense of Science against right wing attacks Labs of Our Own builds the case for a feminist anti racist decolonial queer science tinkering practice that intentionally politically and ethically acts to produce new challenges to the definition and boundaries of the human Provided by publisher [White Flag?](#) Michael Ashcroft, Isabel Oakeshott, 2018-10-02 FOREWORD BY GENERAL SIR MIKE JACKSON After the pain of Iraq and Afghanistan it is hard to imagine the UK being drawn into another war Defence chiefs warn that there is a real prospect of future conflict but they have struggled to persuade most politicians to take them seriously Our leaders have concluded there are no votes in defence and have progressively run down the armed forces Today the army is at its smallest since the Napoleonic Wars the RAF is less than half its size twenty five years ago and the Royal Navy will struggle to muster the ships and weapons required to protect our new aircraft carriers Is there really a risk of war Is our military less capable and if so what could that mean for our future White Flag explains what has happened to our armed forces in recent years and asks whether their decline endangers our safety and prosperity

Web Writing Jack Dougherty, Tennyson O'Donnell, 2015-04-21 The essays in Web Writing respond to contemporary debates over the proper role of the Internet in higher education steering a middle course between polarized attitudes that often dominate the conversation The authors argue for the wise integration of web tools into what the liberal arts does best writing across the curriculum All academic disciplines value clear and compelling prose whether that prose comes in the shape of a persuasive essay scientific report or creative expression The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer Furthermore learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view Indeed a new generation of web based tools for authoring annotating editing and publishing can dramatically enrich the writing process but doing so requires liberal arts educators to rethink why and how we teach this skill and to question those who blindly call for embracing or rejecting technology
