Apache Solr A Practical Approach To Enterprise Search:

Apache Solr Dikshant Shahi,2015-12-26 Build an enterprise search engine using Apache Solr index and search documents ingest data from varied sources apply various text processing techniques utilize different search capabilities and customize Solr to retrieve the desired results Apache Solr A Practical Approach to Enterprise Search explains each essential concept backed by practical and industry examples to help you attain expert level knowledge The book which assumes a basic knowledge of Java starts with an introduction to Solr followed by steps to setting it up indexing your first set of documents and searching them It then introduces you to information retrieval and its implementation in Apache Solr this will help you understand your search problem decide the approach to build an effective solution and use various metrics to evaluate the results The book next covers the schema design and techniques to build a text analysis chain for cleansing normalizing and enriching your documents and addressing different types of search queries It describes various popular matching techniques which are generally applied to improve the precision and recall of searches You will learn the end to end process of data ingestion from varied sources metadata extraction pre processing and transformation of content various search components query parsers and other advanced search capabilities After covering out of the box features Solr expert Dikshant Shahi dives into ways you can customize Solr for your business and its specific requirements along with ways to plug in your own components Most important you will learn about implementations for Solr scoring factors affecting the document score and tuning the score for the application at hand The book explains why textual scoring is not sufficient for practical ranking of documents and ways to integrate real world factors for contributing to the document ranking You ll see how to influence user experience by providing suggestions and recommendations You ll also see integration of Solr with important related technologies such as OpenNLP and Tika Additionally you will learn about scaling Solr using SolrCloud This book concludes with coverage of semantic search capabilities which is crucial for taking the search experience to the next level By the end of Apache Solr you will be proficient in designing and developing your search engine *Apache Solr* Jesse Stitt,2017-07-12 Search is everywhere yet it is one of the most misunderstood functionalities of the IT industry In Apache Solr author Xavier Morera guides you through the basics of this highly popular enterprise search tool You ll learn how to set up an index and how to make it searchable then query it with a simple enterprise search Explanations for precision and recall are also included to help you ensure that relevant accurate results have been returned Custom UIs using SolrItas and SolrNet are also covered This updated and expanded second edition of Book provides a user friendly introduction to the subject Taking a clear structural framework it guides the reader through the subject s core elements A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts This succinct and enlightening overview is a required reading for all those interested in the subject We hope you find this book useful in shaping your future career Business **Intelligent Systems in Big Data, Semantic Web**

and Machine Learning Noreddine Gherabi, Janusz Kacprzyk, 2021-05-28 This book describes important methodologies, tools and techniques from the fields of artificial intelligence, basically those which are based on relevant conceptual and formal development. The coverage is wide, ranging from machine learning to the use of data on the Semantic Web, with many new topics. The contributions are concerned with machine learning, big data, data processing in medicine, similarity processing in ontologies, semantic image analysis, as well as many applications, including the use of machine learning techniques for cloud security, artificial intelligence techniques for detecting COVID-19, the Internet of things, etc. The book is meant to be a very important and useful source of information for researchers and doctoral students in data analysis, Semantic Web, big data, machine learning, computer engineering, and related disciplines, as well as for postgraduate students who want to integrate the doctoral cycle.

Natural Language Processing Recipes Akshay Kulkarni, Adarsha Shivananda, 2019-01-29 Implement natural language processing applications with Python using a problem solution approach. This book has numerous coding exercises that will help you to quickly deploy natural language processing techniques such as text classification, parts of speech identification, topic modeling, text summarization, text generation, entity extraction, and sentiment analysis. *Natural Language Processing Recipes* starts by offering solutions for cleaning and preprocessing text data and ways to analyze it with advanced algorithms. You will see practical applications of the semantic as well as syntactic analysis of text, as well as complex natural language processing approaches that involve text normalization, advanced preprocessing, POS tagging, and sentiment analysis. You will also learn various applications of machine learning and deep learning in natural language processing. By using the recipes in this book, you will have a toolbox of solutions to apply to your own projects in the real world, making your development time quicker and more efficient. What You Will Learn: Apply NLP techniques using Python libraries such as NLTK, TextBlob, spaCy, Stanford CoreNLP, and many more. Implement the concepts of information retrieval, text summarization, sentiment analysis, and other advanced natural language processing techniques. Identify machine learning and deep learning techniques for natural language processing and natural language generation problems. Who This Book Is For: Data scientists who want to refresh and learn various concepts of natural language processing through coding exercises.

Computer-Human Interaction Research and Applications Josef F. Krems, Hugo Plácido da Silva, Pietro Cipresso, 2026-02-10 The three volume set CCIS 2834-2836 constitutes the proceedings of the 9th International Conference on Computer-Human Interaction Research and Applications (CHIRA 2025) held in Marbella, Spain, during October 2025. The 21 full papers and 64 short papers presented in the proceedings were carefully reviewed and selected from 106 submissions. These papers focus on the research advancements and practical applications within various areas in the field of Computer-Human Interaction, including Human Factors and Information Systems, Interactive Devices, Interaction Design, and Adaptive and Intelligent Systems. The papers were organized in topical sections as follows: Part I: Human Factors for Interactive Systems; Research and Applications; Part II: Interactive Devices, Adaptive and Intelligent Systems; Part III: Interaction Design.
