Mass Awakening Shoshi Herscu, 2018-10-08 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the scenes for the past half century The author an independent journalist became aware of this agenda only in the past few years She found it hard to believe but in depth research and the testimony of whistleblowers worldwide have exposed these strategies They include geoengineering chemtrails fluoridation of water supplies GMOs vaccinations false flag terrorist attacks and economic warfare by the group David Wilcock calls the Cabal However despite this grim reality a positive shift of mass awakening is occurring worldwide Tribunals are being established to prosecute elite offenders revelations of hidden technology like free energy and new economic models are being put forth The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness MASS AWAKENING gives us all real hope for an amazing future Mass Awakening is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material rarely covered in print It is both a true inspiration and a much needed breath of fresh air Ada Tourtsakis PrepareForChangeLeadership.org

Security in the Anthropocene Judith Nora Hardt,Cameron Harrington,Franziskus von Lucke,Adrien Estève,Nicholas P. Simpson,2023-05-20 The speed and scale of climate change presents unique and potentially monumental security implications for individuals future generations international institutions and states Long dominant security paradigms and policies may no longer be appropriate for dealing with these new security risks of the Anthropocene In response to this phenomenon this book investigates how states have reacted to these new challenges and how their different understandings of the climate security nexus might shape global actions on climate change It focuses on the perceptions framings and policies of climate security by members of the United Nations Security Council UNSC the world s highest ranking multilateral security forum Empirically the book presents detailed bottom up case studies from local authors of every UNSC member state in 2020 It combines this with an innovative theoretical approach spanning national human and ecological security that helps to capture the complex dynamics of state led approaches to dealing with security in the Anthropocene This book therefore offers readers a compelling picture of climate security politics in the UNSC beyond Council debates and resolutions By comparing and contrasting how different framings of climate security impact various policy sectors of members states the authors are able to assess the barriers and opportunities for addressing climate security locally and globally This timely contribution to the literature on climate security examines the under analysed relationship between the policy approaches of key countries at the national and at the international level Policy alignment at multiple levels of governance will be critical if we are to respond adequately to the ubiquitous challenges posed by climate change and variability Shirley Scott Head of School and Professor School of Humanities and Social Sciences UNSW Canberra at the Australian Defence Force Academy Australia Climate change is increasingly considered a problem of security yet what that means remains deeply contested Behind the rhetoric of climate crisis threats and emergencies UN Security Council members offer profoundly different ideas about what climate change and security mean and what should be done about it This book brilliantly lays out the hidden or overlooked divergences of interests and perspectives on climate security that are playing out

in the world's most central security institution as it grapples with securing a climate unstable world Olaf Corry Professor of Global Security Challenges Faculty of Social Sciences School of Politics and International Studies University of Leeds United Kingdom Security is a contested concept whose scope and direction are subject to change The prime value of this volume is the systematic documentation of the dynamics in defining what security is about in reaction to ever dramatic climate change The book's focus on a somewhat representative sample of states the members of the Security Council provides robust evidence that even though many governments remain reluctant to retreat from traditional perceptions of security there is a large and growing acceptance of the need to adjust priorities in providing security in response to climate change and its consequences Michael Brzoska Professor and Senior Research Fellow IFSH Institute for Peace Research and Security Policy Universität Hamburg Germany The climate security literature has often been labelled as West-centric with little recognition of knowledge production processes and different historical socio-economic and political experiences of various societies in the Global South This book goes beyond the conventional approaches to provide a whole range of perspectives on climate security reflective of diverse contextual realities covering factors such as development imperatives conflict dynamics postcolonial legacies institutional actor complexities and geopolitical contestations among others By focusing on the climate security approaches of various countries case studies at the domestic and international levels the applicability of existing climate security frameworks or lack thereof in the context of these case studies is brilliantly brought out by the chapters This book weaves together these diverse perspectives by providing a comprehensive overview of climate security related policies of countries from both Global South and Global North and their positions on climate change and security in the UNSC They reflect the varying norms interests priorities and challenges that continue to shape the climate security agenda within the UNSC as well as non-UNSC platforms This book is a must-read for anyone interested in gaining an in-depth and invigorating understanding of the evolution of distinct climate security discourses and practices in varying contexts Dhanasree Jayaram Assistant Professor Department of Geopolitics and International Relations Manipal Academy of Higher Education MAHE India Research Fellow Centre Marc Bloch Climate Security in the Anthropocene provides a timely and compelling account of the conceptualizations of the climate security nexus and their implications By considering climate security through the lenses of national human and ecological security it provides a sophisticated account of the different dimensions involved in the UNSC debates and beyond The collection of chapters illustrating the positions of the members of the UN Security Council in 2020 not only provide an informative account but also sheds light on the challenges that the UNSC faces in dealing with climate change Maria Julia Trombetta Associate Professor in Politics and Environment School of International Studies Institute of Asia and Pacific Studies University of Nottingham Ningbo China China The book Climate Security in the Anthropocene is the first systematic assessment of climate security decision-making and governance of the UN Security Council It is groundbreaking as it combines empirical bottom-up case studies of perceptions and policies of different

ministries and governmental agencies of UNSC member states with a novel theoretical framework contrasting different security framings and conceptions in the Anthropocene. Discussing various policy sectors, the study assesses barriers and opportunities and provides novel insights on multi-scale responses and interactions in the climate security nexus from local to global levels, connecting individuals, future generations, international institutions, and states. The book is highly recommendable for everyone interested in the emerging field of policy-oriented climate security research.

Jürgen Scheffran
Professor for Integrative Geography, Head of the Research Group Climate Change and Security, CLISEC Center for Earth System Research and Sustainability, Universität Hamburg, Germany. This volume provides multifocal insights into the climate security nexus, combining critical security studies and international relations theories in the age of the Anthropocene. Analyzing the perceptions, policies, and positions of 15 UN Security Council member states, this thought-provoking piece demonstrates how national security, human security, and ecological security have advanced as conceptual innovations. Offering a rich and diverse range of empirical case studies, this piece is a strong contribution to academic discourse and teaching alike.

Franziska Müller
Junior Professor for Political Science, Faculty of Business, Economics, and Social Sciences, Universität Hamburg, Germany. Virtually Lost Garry Robson, 2023-05-16. This book examines the connections between the psycho-social difficulties and challenges faced by children and younger people in their online lives, the structure, character, and motivations of the corporate system behind the screen, and the possibility that the digital technostructure may come to form the backbone of a new post-democratic system of technocratic governance. Much of the originality of this book lies in its blending of subjects that are not often combined, thereby offering a fresh perspective. Generation studies, the philosophy of technology, the history of the idea of technocracy, the technologically enhanced merger of corporate and governmental power in the U.S. system, the society-shaping goals and capabilities of the big tax-exempt American foundations over the last hundred years, the elite superclass gaming of formally constituted transnational and global institutions, and the way the United Nations-centred SDG/ESG system is itself developing in the direction of a technocratic system of economic and population management. The book will appeal to readers interested in relationships between our contemporary global power elite, the structures it has created, and processes it has set in motion, and how these affect young people whose development is already being over-determined by the activities of the big Silicon Valley entities and their associates.

Human Rights and Business Denise Wallace, 2014-11-27. This book addresses the ever more urgent question as to whether individuals, indigenous peoples, or other vulnerable groups should be entitled to remedies under international law for violations of their human rights by transnational corporations. Using the tools of policy-oriented jurisprudence, the author analyzes, in great historical and cross-cultural detail, the various claims involved, including the status of corporations and their purpose and growth beyond borders in the era of globalization, countervailing demands for respect and rights of individuals and groups, the changing role of the nation-state in international law, movements for corporate social responsibility, and corporate

accountability trends in decision both domestically and internationally as well as voluntary codes Her appraisal of past decisions and suggestions leads her to conclude that only binding international legal remedies against transnational corporations can fully address the legitimate claims of individuals or groups
