Empires of Ideas William C. Kirby, 2022-07-05 A Marginal Revolution Best Non fiction Book A fascinating book Steven Mintz Inside Higher Ed Substantive on virtually every page the author actually understands how universities work An impressive performance Tyler Cowen Marginal Revolution With his extraordinary breadth of curiosity and equal ease in the histories and cultures of these countries only Bill Kirby could have written this book It is must reading for everyone who cares about universities a thought provoking lesson in the strange mix of durability and vulnerability that defines this key modern institution Richard Broadhead President Emeritus Duke University William Kirby s new book is unique I know of nothing else on higher education that resembles it in breadth scope and sheer comparative information and analysis Anyone interested in the nature of universities during the past two centuries will want to read this volume Neil L Rudenstine President Emeritus Harvard University Today American institutions dominate nearly every major ranking of global universities Yet in historical terms America s preeminence is relatively new and there is no reason to assume that US schools will continue to lead the world a century from now Indeed America s supremacy in higher education is under great stress particularly at its public universities while Chinese universities are on the ascent Will China threaten American primacy Empires of Ideas looks to the past two hundred years for answers examining the successes of leading universities to determine how they rose to prominence and what threats they currently face William C Kirby gives special attention to the challenges that Chinese academic leaders must confront reinvesting in undergraduate teaching developing new models of funding and navigating a political system that may undermine a true commitment to free inquiry and academic excellence

[The Slippery Slope of Healthcare](#) Steven Z. Kussin, 2020-03-24 Dr Steven Kussin physician and a pioneer in the Shared Decision movement takes readers through the steps of how to avoid the many pitfalls of unnecessary and sometimes even dangerous medical care The American healthcare system is subsidized by its services to healthy people The goal as it is for any business is to encourage people to become consumers by creating an emotionally fueled demand for things that are suddenly and urgently needed It s hard to make healthy people well it s easy to make them sick Under the goal to make you even healthier the medical industry identifies and encourages investigations and preventive technologies for problems unlikely to occur unlikely to harm unlikely to benefit from testing and once diagnosed unlikely to benefit from treatment Profitable services go on indefinitely for those who are young and well For the health care industry being in good health is not just the best way to live good health is also the slowest way to die Many people find themselves on what the author calls the Slippery Slope experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk expense and fewer benefits Many people who in the attempt to improve what is already just fine unquestioningly pay an immediate and visible price for what are distant invisible and uncertain benefits The central starting point for initiating a Slippery Slope adventure can be the first blood test the first screening test the first x ray the first pill or the first diagnosis that s accepted by unwitting and trusting consumers The bottom of the Slippery Slope is occupied by those previously well but who now are damaged and by others who suffered needless unscheduled deaths America s famed consumer skepticism when judging retail products is curiously and dangerously absent in their interactions within the healthcare system Here Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives information and resources He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves The power of money the authority of science the stature of physicians the lure of elective health improvements the promise of technology and the pitch perfect perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests This book is dedicated to one lesson The view from atop the Slope before making a health care decision is better than the view from the bottom after having made a bad one For more information visit <https://theslipperyslopebook.com>
