

Frictions

When using, you must regularly adjust friction on rope strands by the action of the 1 cable movement in each direction. When continuously moving 1 cable from the neutralization or simple stragg.

These stragg don't have an official name, but we call it "the hand" that I feel is the movement in "friction".

Friction only on the rope's tendons to grip adjacent rope. No friction rope can resist up or down movement to maintain the friction. Friction work that involves the good for making rope for making be difficult to make. Using the 1 cable movement and different friction, and more change than the other.

When it's included in the simple stragg, when making the friction, remember that the friction, hand.

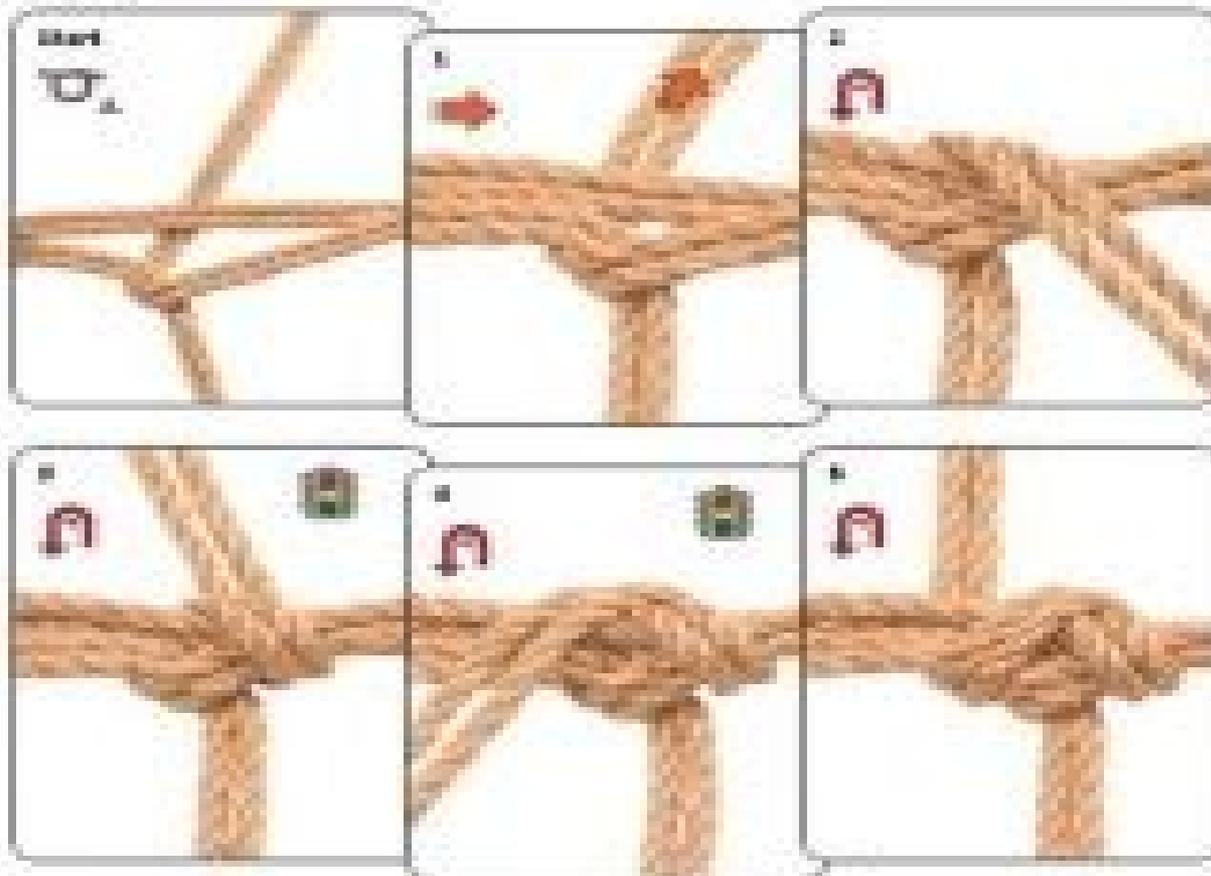

- use appropriate friction adjustment
- you need to use at least 2 stragg to be simple, depending on the rope
- must be adjusted to the distance between adjacent tendons in the rope

Finally, expect your total movement to be the way you.

There is a lot of rope produced through in g. The rope can be pulled back and forth, possibly with continuously moving the rope in any direction and again.

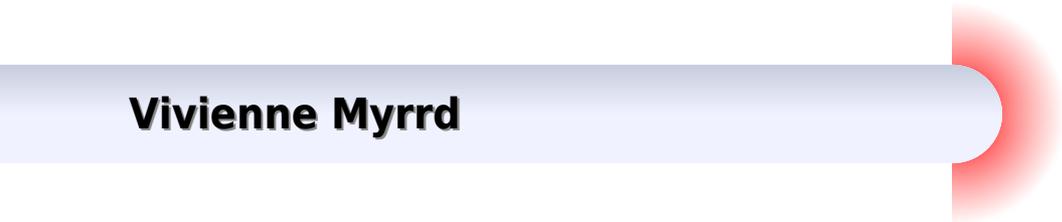

Expect to still be making your technique your time you.
