

Computing Discounts Activity

Context

When purchasing items, it is often not clear how much the total price will be after discounts are applied. For example, suppose a \$100 item is discounted 10% and then 20% off the total price. The difference between the original price and the total price is called the savings. Alternatively, when two successive discounts are applied, the percentage saved is, for example, when a person has a 10% discount on a \$100 item, the person saves \$10. The savings percentage is the amount by which the price is reduced by the original amount. For example, if a person has a 10% discount on a \$100 item, the savings percentage is 10%.

Suppose a person has a 10% discount on a \$100 item. The savings percentage is 10%.

Let x be the original price, y be the discount, and z be the savings.

Discount percentage = $\frac{y}{x}$ (where x is the original price, y is the discount).

Let x be the original price, y be the discount, and z be the savings.

Let x be the original price, y be the discount, and z be the savings.

Figure 1: Computing the total price.

Item	Original Price	Discount	Final Price
Apple	\$100.00	\$10.00	\$90.00
Banana	\$200.00	\$20.00	\$180.00
Orange	\$300.00	\$30.00	\$270.00
Pineapple	\$400.00	\$40.00	\$360.00
Watermelon	\$500.00	\$50.00	\$450.00
Strawberry	\$600.00	\$60.00	\$540.00

Figure 2: Applying the 10% discount to the items.

As the discounts are applied, the total price will decrease. In this case, the total price will decrease by 10% for each item. The total price will be \$540.00 after the 10% discount is applied to all items.

1. The original price of the items is \$100.00. The discount is 10%. The final price is \$90.00.
2. The original price of the items is \$200.00. The discount is 10%. The final price is \$180.00.
3. The original price of the items is \$300.00. The discount is 10%. The final price is \$270.00.
4. The original price of the items is \$400.00. The discount is 10%. The final price is \$360.00.
5. The original price of the items is \$500.00. The discount is 10%. The final price is \$450.00.
6. The original price of the items is \$600.00. The discount is 10%. The final price is \$540.00.
