Oswald Gueth, 1913      **The Production Sites of Architecture** Sophia Psarra, 2019-01-14 The Production Sites of  
Architecture examines the intimate link between material sites and meaning It explores questions such as how do spatial  
configurations produce meaning What are alternative modes of knowledge production How do these change our  
understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that  
everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial  
configuration form order and classification secondly the interaction of architecture and these notions with other areas of  
knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond  
perspectives which divide architecture into either an aesthetic or practical art the authors show how buildings are informed  
by intersections between site and content space and idea thought and materiality architecture and imagination Presenting  
illustrated case studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John  
Soane The Production Sites of Architecture makes a major contribution to our understanding of architectural theory

Bauhaus Construct Jeffrey Saletnik, Robin Schuldenfrei, 2013-03-01 Reconsidering the status and meaning of Bauhaus  
objects in relation to the multiple re tellings of the school s history this volume positions art objects of the Bauhaus within the  
theoretical artistic historical and cultural concerns in which they were produced and received Contributions from leading  
scholars writing in the field today including Frederic J Schwartz Magdalena Droste and Alina Payne offer an entirely new  
treatment of the Bauhaus Issues such as art and design pedagogy the practice of photography copyright law and critical  
theory are discussed Through a strong thematic structure new archival research and innovative methodologies the questions  
and subsequent conclusions presented here re examine the history of the Bauhaus and its continuing legacy Essential  
reading for anyone studying the Bauhaus modern art and design      **Buildings and Projects** Richard Joseph Neutra, 1951

 Emmons,Marcia Feuerstein,Negar Goljan,2025-06-30 Finishing in Architecture Polishing Completing Ending explores the  
 topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture  
 Finishing is essential to all human practices and concepts of time yet simultaneously it is largely impossible to identify an  
 entirely finished state of being As mortals we organize our worlds into beginnings and endings starts and finishes  
 Architecture s temporality however may contain something of both the mortal and immortal within it a desire for permanence  
 combined with lamentation over its impossibility While many approaches to finishing construct two opposed ontological  
 conditions the finished and the unfinished this dualistic ploy neglects the complexity of architectural practice cultural  
 reception and historiographic shifts in semiotics during the lifetime of a building More nuanced approaches are examined in  
 this collection of 38 essays and creative works from a diverse group of scholars architects and artists who conceptualize  
 finishing not simply as a final outcome but as an extended action a mood that presumes an end is near all the while working  
 continuously toward but never achieving completion It is here that the concept of finishing is not a state of being but a state  
 of becoming as an active thickening of time when the end is thought to be imminent but not yet attained Finishing more than  
 a final endpoint is a void state that is extended through efforts framing its territory while never quite containing it From the  
 material to the procedural and the conceptual this volume explores the practices of finishing in architecture within three  
 currents surfaces projects and most broadly architectural times It will be of interest to students and instructors of
