CPU (Central Processing Unit) – This is the brain of the computer. The central processing unit, motherboard, hard drive, memory, etc. are all contained in the computer case...everything that makes the computer work.

Monitor – A device that displays the signals of the computer. Today, monitors are typically thin or slimline LCD displays.

Keyboard – A panel of keys used to operate a computer. It is the primary way we enter data into a computer.

Mouse – a hand-operated electronic device that controls the coordinates of a cursor or pointer on your computer screen as you move it around on a pad. An optical mouse has an optical light on the bottom to control the cursor or pointer. A mechanical mouse has a ball on the bottom that rolls to control the cursor or pointer.

Printer – A machine connected to a computer used to print text or pictures onto paper.

Scanner – a device that captures images from photographic prints, posters, magazine pages, and similar sources for computer editing and display.
