Computer Networking Practical Manual Mjauto:

A Practical Guide to Computer Communications and Networking Richard J. Deasington, 1984 Computer Networking: Principles, Protocols, and Practice Olivier Bonaventure, 2011-10-30 This textbook came from a frustration of its main author Many authors chose to write a textbook because there are no textbooks in their field or because they are not satisfied with the existing textbooks This frustration has produced several excellent textbooks in the networking community At a time when networking textbooks were mainly theoretical Douglas Comer chose to write a textbook entirely focused on the TCP IP protocol suite a difficult choice at that time He later extended his textbook by describing a complete TCP IP implementation adding practical considerations to the theoretical descriptions in Richard Stevens approached the Internet like an explorer and explained the operation of protocols by looking at all the packets that were exchanged on the wire Jim Kurose and Keith Ross reinvented the networking textbooks by starting from the applications that the students use and later explained the Internet protocols by removing one layer after the other
