Lindstrom, 2024-06-25 Challenging mainstream

architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its inattentiveness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines **Service Oriented Architecture For Dummies** Hurwitz, Robin Bloor, Carol Baroudi, Marcia

wall and especially in the late nineties bilateral aid responds more to economic need and the quality of a recipient country's policy and institutional environment and less to debt size and colonial linkages. Importantly we find that when a country uses a PRSP and passes the HIPC decision point the perverse effect of large bilateral and multilateral debt shares on aid flows is reduced suggesting less defensive lending. Overall it appears international aid architecture changes have led to more selectivity in aid allocations. The specific factors causing these changes remain unclear however. Furthermore there remain large differences among donors in selectivity that appear to relate to donors own institutional environments. Together this suggests that further reforms will have to be multifaceted.
