Case Studies In Pharmacy Ethics:

Case Studies in Pharmacy Ethics Robert M. Veatch, Amy Marie Haddad, 1999 Every pharmacist constantly makes ethical choices Sometimes these choices are dramatic life and death decisions but often they are more subtle less conspicuous choices that are nonetheless important Assisted suicide conscientious refusal pain management equitable and efficacious distribution of drug resources within institutions and managed care plans confidentiality and alternative and non traditional therapies are among the issues that are of unique concern to pharmacists One way of seeing the implications of such issues and the moral choices they pose is to look at the experiences and the choices that have had to be made in situations typically faced by pharmacists This book is a collection of those situations based on the real experiences of practicing pharmacists The use of case studies in health care ethics is not new but in pharmacy it is This text is an important teaching tool that will help pharmacy students and pharmacists address the increasing number of ethical problems arising in their profession It is not merely a compilation of cases but rather is organized for the systematic study of applied ethics Part I shows how to distinguish ethical problems from other kinds of evaluative judgments and examines the sources of values in pharmacy posing basic questions about the meaning and justification of ethical claims Part II explores the basic principles of ethics as they have an impact on pharmacy Specific cases from clinical settings present in a systematic way the various questions raised by each of the major ethical principles benefiting the patient distributing resources justly respecting autonomy dealing honestly with patients keeping promises of confidentiality and avoiding killing Part III examines some of the special problems of contemporary pharmacy such as the linkages between pharmaceutical care and professional practice human experimentation reproductive issues genetic technology death and dying and mental health

Case Studies in Pharmacy Ethics Robert Veatch, Amy Haddad, 2010-04-10 Pharmacists face ethical choices constantly sometimes dramatic life and death decisions but more often subtle less conspicuous choices that are nonetheless important Among the topics confronted are assisted suicide conscientious refusal pain management equitable distribution of drug resources within institutions and managed care plans confidentiality and alternative and non traditional therapies Veatch and Haddad's book first published in 1999 was the first collection of case studies based on the real experiences of practicing pharmacists for use as a teaching tool for pharmacy students The second edition accounts for the many changes in pharmacy since 1999 including assisted suicide in Oregon the purchasing of less expensive drugs from Canada and the influence of managed care on prescriptions The presentation of some cases is shortened most are revised and updated and two new chapters have been added The first new chapter presents a new model for analyzing cases while the second focuses on the ethics of new drug distribution systems for example hospitals where pharmacists are forced to choose drugs based on cost effectiveness and internet based pharmacies

[Ethics in Pharmacy Practice: A Practical Guide](#) Dennis M. Sullivan, Douglas C. Anderson, Justin W. Cole, 2021-06-16 This textbook offers a unique and accessible approach to ethical decision making for practicing

pharmacists and student pharmacists Unlike other texts it gives clear guidance based on the fundamental principles of moral philosophy explaining them in simple language and illustrating them with abundant clinical examples and case studies The strength of this text is in its emphasis on normative ethics and critical thinking and that there is truly a best answer in the vast majority of cases no matter how complex The authors place high trust in a pharmacist's moral judgment This teaches the reader how to think based on ethical principles not necessarily what to think This means navigating between the two extremes of overly theoretical and excessively prescriptive The cogent framework given in this text uses the language of competing duties identifying the moral principles at stake that create duties for the pharmacist This is the balancing act of normative ethics and of deciding which duties should prevail in a given clinical situation This work presents a clear cut pathway for resolving ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Presents a clear cut pathway for resolving the ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Jon E Sprague RPh PhD Director of Science and Research for the Ohio Attorney General *The Cambridge Textbook of Bioethics* Peter A.
