Thermoforming of polyamide 6 semi-finished products made of Durethan® BKV 315 Z H2.0

Figure 1 Thermoform from Durethan® BKV 315 Z H2.0

Glass fiber-reinforced polyamide 6 (PA 6) can also be processed using thermoforming techniques, as shown by various protective covers for ships' engines manufactured by [MTU Friedrichshafen GmbH](#), [Reiss Kunststofftechnik GmbH](#) based in Tettnang, Germany makes the covers from [SUSTAVACL® 6 GF](#) semi-finished products. These sheets are among the first thermoformable semi-finished products made of polyamide 6 available on the market. They are manufactured by [Reiss Kunststoff SUSTAPLAST KG](#), Lehnstein, Germany, and consist of Durethan® BKV 315 Z H2.0 from LANXESS. Their high heat resistance compared with standard thermoformed materials was one of the features that made them particularly useful for ships' engines. Furthermore, vacuum thermoforming is the most cost-effective solution for this application. Compared with injection molding, molds can be built for a fraction of the cost – particularly when large components are to be produced.

Material: Durethan® BKV 315 Z H2.0

Another reason for using PA 6 semi-finished products is their high tensile strength and stiffness. Their stiffness allows the walls to be made thinner than is possible with other thermoformed materials. Although the engine covers are large, dimensional stability is high and warpage minimal. They are also highly resistant to breakage because the PA 6 has been modified for impact resistance. Along with their low weight, this is an important factor in withstanding the high dynamic loads caused by engine vibration. Thanks to the high heat resistance of PA 6, the cover components can withstand continuous working temperatures of 140 °C with short-term temperature peaks of 170 °C. For use in the engine room, they also have the necessary resistance to oil, grease, diesel fuel and many other chemicals typically found on board ships.

China's Quest for Foreign Technology William C. Hannas, Didi Kirsten Tatlow, 2020-09-22 This book analyzes China's foreign technology acquisition activity and how this has helped its rapid rise to superpower status. Since 1949, China has operated a vast and unique system of foreign technology spotting and transfer aimed at accelerating civilian and military development, reducing the cost of basic research and shoring up its power domestically and abroad without running the political risks borne by liberal societies as a basis for their creative developments. While discounted in some circles as derivative and consigned to perpetual catch-up mode, China's hybrid system of legal, illegal, and extralegal import of foreign technology combined with its indigenous efforts is what the authors believe is enormously effective and must be taken seriously. Accordingly, in this volume 17 international specialists combine their scholarship to portray the system's structure and functioning in heretofore unseen detail using primary Chinese sources to demonstrate the perniciousness of the problem in a manner not likely to be controverted. The book concludes with a series of recommendations culled from the authors' interactions with experts worldwide. This book will be of much interest to students of Chinese politics, US foreign policy, intelligence studies, science and technology studies, and International Relations in general. *Colored concrete energized by Lanxess Energizing Chemistry* Lanxess Deutschland GmbH Business Unit Inorganic Pigments, 2012 **Brand Building and Marketing in Key Emerging Markets** Niklas Schaffmeister, 2015-10-09 This book combines scientific research and professional insights on brand and marketing strategy development in major emerging growth markets. It presents a detailed outline of the Brazil, Russia, India, and China (BRIC) markets to understand their cultural and socio-economic complexity. With emerging markets at the center, major paradigm shifts are explained, such as one-world strategies. The author reveals the importance of market-driven positioning that uses local differences and consumer preferences as opportunities without contradicting a corporation's global positioning. Professionals in international marketing and business strategists will find the hands-on guidance to 25 new success strategies, particularly useful. This book is also a must-read for people dealing with branding and marketing in a globalized world. **Corporate Data Quality** Boris Otto, Hubert Österle, 2015-12-08 Data is the foundation of the digital economy. Industry 4.0 and digital services are producing so far unknown quantities of data and making new business models possible. Under these circumstances, data quality has become the critical factor for success. This book presents a holistic approach for data quality management and presents ten case studies about this issue. It is intended for practitioners dealing with data quality management and data governance as well as for scientists. The book was written at the Competence Center Corporate Data Quality (CC CDQ) in close cooperation between researchers from the University of St. Gallen and Fraunhofer IML, as well as many representatives from more than 20 major corporations. Chapter 1 introduces the role of data in the digitization of business and society and describes the most important business drivers for data quality. It presents the Framework for Corporate Data Quality Management and introduces essential terms and concepts. Chapter 2

presents practical successful examples of the management of the quality of master data based on ten cases studies that were conducted by the CC CDQ The case studies cover every aspect of the Framework for Corporate Data Quality Management Chapter 3 describes selected tools for master data quality management The three tools have been distinguished through their broad applicability method for DQM strategy development and DQM maturity assessment and their high level of innovation Corporate Data League Chapter 4 summarizes the essential factors for the successful management of the master data quality and provides a checklist of immediate measures that should be addressed immediately after the start of a data quality management project This guarantees a quick start into the topic and provides initial recommendations for actions to be taken by project and line managers Please also check out the book s homepage at cdqbook.org
