From the beginning of 21st century there has been an awareness of risk in the environment along with a growing concern for the continuing potential damage caused by hazards In order to ensure environmental sustainability a better understanding of natural disasters and their impacts is essential It has been recognized that a holistic and integrated approach to environmental hazards needs to be attempted using common methodologies such as risk analysis which involves risk management and risk assessment Indeed risk management means reducing the threats posed by known hazards whereas at the same time accepting unmanageable risks and maximizing any related benefits The risk management framework involves evaluating the importance of a risk either quantitatively or qualitatively Risk assessment comprises three steps namely risk identification data base event monitoring statistical inference risk estimation magnitude frequency economic costs and risk evaluation cost benefit analysis Nevertheless the risk management framework also includes a fourth step risk governance i e the need for a feedback of all the risk assessment undertakings There is currently a lack of such feedback which constitutes a serious deficiency in the reduction of environmental hazards This book emphasises methodological approaches and procedures of the three main components in the study of environmental hazards namely forecasting nowcasting before monitoring during and assessment after based on geoinformatic technologies and data and simulation through examples and case studies These are considered within the risk management framework and in particular within the three components of risk assessment namely risk identification risk estimation and risk evaluation This approach is a contemporary and innovative procedure and constitutes current research in the field of environmental hazards Environmental Hazards Methodologies for Risk Assessment and Management covers hydrological hazards floods droughts storms hail desertification biophysical hazards frost heat waves epidemics forest fires geological hazards landslides snow avalanches tectonic hazards earthquakes volcanoes and technological hazards This book provides a text and a resource on environmental hazards for senior
