

Chapter 1

Anatomy

Learning objectives

To learn the anatomy of the eye, orbit and the third, fourth and sixth cranial nerves, to permit an understanding of medical conditions affecting these structures.

Introduction

A knowledge of ocular anatomy and function is important to the understanding of eye diseases. A brief outline is given below.

Gross anatomy

The eye (Fig. 1.1) comprises:

- A tough outer coat which is transparent anteriorly (the *cornea*) and opaque posteriorly (the *sclera*). The junction between the two is called the *limbus*. The extra-ocular muscles attach to the outer sclera while the optic nerve leaves the globe posteriorly.
- A rich vascular coat (the *uvea*) forms the *choroid* posteriorly, which is lined by and firmly attached to the retina. The choroid nourishes the outer two-thirds of the retina. Anteriorly, the uvea forms the ciliary body and the iris.
- The *ciliary body* contains the smooth *ciliary muscle*, whose contraction allows lens shape to alter and the focus of the eye to be changed. The ciliary epithelium secretes *aqueous humour* and maintains the ocular pressure. The ciliary body provides attachment for the *iris*, which forms the pupillary diaphragm.

The Signal Ted G Lewis, 2019-06-03 Computers are the foundation of the information age but communication technology is the foundation of the foundation Without the theories and practical applications of theory brought to us by the pioneers of communication the computer age would perhaps have remained in the back office hidden away as infrastructure like electricity or running water critical to modern life but not as transforming as the combination of communications and computing The information age exploded once machines were endowed with the ability to talk among themselves The Signal connects everything to everything else in both communication and in the metaphorical sense as the link between and among people Features Identifies the key ideas underlying modern communications technology and documents the contributions of its inventors Explores the signal in communication and also in the metaphorical sense as the link between and among people Leads the reader through a journey from ancient number systems to Voyager II to radio and MP3s to quantum cryptography Includes coverage of Signals from Hell including memes and fake news on the Internet Looks to the future of communication with emergent 5G

The Silent Retirement Crisis Cindy Couyoumjian, 2023-10-31 Retirement does not have to be stressful and scary With proper planning Americans can not only retire comfortably They can also prosper Cindy Couyoumjian's third book explores the silent retirement crisis that will impact millions of Americans She uses the term silent to convey the idea that the majority of those who are about to retire or are in retirement share a common and unspoken fear running out of money Couyoumjian asserts that the anxiety people have about their retirement is not a misdirected emotion We are led to believe that the fear silent as it is is due to our lack of financial literacy or not having a financial plan in place While some of this is true it's not totally our fault Her book addresses the big picture systemic problems that conspire against average Americans while favoring the wealthy few The first third of the book explores how broken capitalism has contributed to our broken retirement system The second third offers us a new way of thinking and investing underscoring how university endowments have achieved extraordinary return by using a multi asset class investment approach Part III offers meaningful solutions to the retirement crisis The author introduces us to her flexible and customizable REALM model designed to potentially protect clients from sudden market losses Also included is other valuable information such as estate planning tax strategies 401 k rollover options life insurance and long term care initiatives Couyoumjian shows us that retirement planning isn't just savings and investing With an umbrella of other planning items we can take action to make the difference between an anxious retirement defined by uncertainty and a comfortable one grounded in prosperity Founder of Cinergy Financial Cindy Couyoumjian believes financial literacy is a moral imperative and has dedicated her professional life to helping people understand the constantly evolving financial and economic landscape With 37 years of industry experience she is a leader in the financial industry managing over 200 000 000 in assets She is the author of two previous best selling books Redefining Financial Literacy 2021 and The Rise of Women and Wealth 2022 She has appeared on NBC CBS FOX 40 talk radio AM870
