Macao's Church of Saint Paul Cesar Guillen-Nuñez, 2009-01-01 Macao's Ruins of St Paul correct name Church of Madre de Deus is the only example of Baroque art and architecture in China This beautifully illustrated book explores anew the now vanished but once renowned Church as well as the Jesuit university college of which it was part Both Church and College were destroyed by fire in 1835 From the perspective of the history of art they have remained poorly explored The author remedies this by imaginatively reconstructing their ground plans architecture and decoration in the light of new information in original documents that he has found in archives and libraries in Europe and Macao In his re-creation of the buildings he illustrates and draws on the evidence of selected Jesuit buildings in Italy Portugal Spain and Portuguese India and considers the historical Counter Reformation environment that eventually led to the College of Madre de Deus in China The most recent art historical findings on the Mannerist and Baroque art of the Jesuits in Europe and Iberian colonies are also taken into account The author who first identified the surviving facade of the Church as a retablo facade an unusual type of Iberian and Latin American church facade resembling an altarpiece brings his argument to its logical conclusion by relating it to the Church's plan and decoration An extremely important aspect of the art promoted by the Jesuits centring on the cult of passive martyrdom is also candidly discussed This book will enable the general public to better appreciate the Ruins and provides much of interest and value to scholars students architects art museums and cultural organizations Publisher's website

Lloyd,2022-08-19 Drawing on rich archival research and focusing on works by leading artists including Guido Reni and Gian Lorenzo Bernini Karen J Lloyd demonstrates that cardinal nephews in seventeenth century Rome those nephews who were raised to the cardinalate as princes of the Church used the arts to cultivate more than splendid social status Through politically savvy frescos and emotionally evocative displays of paintings sculptures and curiosities cardinal nephews aimed to define nepotism as good Catholic rule Their commissions took advantage of their unique position close to the pope embedding the defense of their role into the physical fabric of authority from the storied vaults of the Vatican Palace to the sensuous garden villas that fused business and pleasure in the Eternal City This book uncovers how cardinal nephews crafted a seductively potent dialogue on the nature of power fuelling the development of innovative visual forms that championed themselves as the indispensable heart of papal politics The book will be of interest to scholars working in art history early modern studies religious history and political history
