*Tale of Two Cranes* Nathaniel Gronewold, 2023-09-08 It has been 50 years since the United States attempted a conservation revolution with the passing of the Endangered Species Act in 1973 Now fifty years later the Fish and Wildlife Service finds itself at a crossroads some recovery efforts are succeeding but too many are either failing or stuck in neutral even after decades of work Take for example the story of two cranes the whooping crane of southeastern Texas and the red crowned crane of northern Japan Both were pushed to the brink of

extinction by the early 1900s with surviving populations numbering as few as 20 to 40 individuals and are now the subjects of concerted recovery efforts led by advanced national governments The U S Fish and Wildlife Service has focused mainly on habitat protection while at Japan s Ministry of the Environment conservation authorities have leaned most heavily on direct population survival via a long standing winter feeding program These two case studies provide a template for comparing different approaches towards endangered species habitat management vs population management Thus far the Japanese approach has proved more successful but the story isn t over yet What can these lessons teach us about managing other endangered species Can species rehabilitation be standardized or must each effort be designed and implemented on a case by case basis A Tale of Two Cranes will serve as a launching pad for better understanding the progress and pitfalls inherent in endangered species management through 50 years of lessons learned since the landmark Endangered Species Act was enacted by the United States Congress in December 1973 Also considering its success stories like the Attwater s prairie chicken the ESA has had an enormous impact on conservation theory and practice throughout the world from Tasmanian devils in Australia to the vaquita porpoises of Mexico But worsening government budget constraints public inattention and a continuous string of setbacks experienced within numerous rehabilitation initiatives will all eventually conspire to challenge the conventional thinking on endangered species management like never before Author Nathaniel Gronewold explains how we got here where things stand today and what lessons conservationists must take to heart as the world continues to struggle to put a halt to an ongoing global extinction crisis *The Americas Social Security Report*, 2008 *Academic Podcasting and Mobile Assisted Language Learning: Applications and Outcomes* Facer, Betty Rose, Abdous, M?ammed, 2010-12-31 The use of Academic Podcasting Technology and MALL Mobile Assisted Language Learning is reshaping teaching and learning by supporting expanding and enhancing course content learning activities and teacher student interactions *Academic Podcasting and Mobile Assisted Language Learning Applications and Outcomes* shares innovative and pedagogically effective ways to improve foreign language education by identifying the instructional uses and benefits of academic podcasting technology and MALL in foreign language acquisition These include instructional uses students perceived learning gains how instructors can use have used the technology successes and challenges study abroad experiences with the technology pedagogical impact and economic perspectives on its use **Business English Smart Business Talk** Joern Meissner, Tracy C.
