ENERGY AND ENVIRONMENTAL MANAGEMENT IN METALLURGICAL INDUSTRIES GUPTA, R. C., 2012-12-06 This comprehensive book deals with the environmental aspects of metallurgical industries including ferrous iron and steel DRI units EAF units ferroalloys and foundries and non ferrous aluminium copper lead and zinc plants The text comprising of eight

chapters discusses fundamental aspects of environment management various energy sources available on the earth and environment awareness required for sustained economic growth The book provides a thorough understanding of pollution sources in metallurgical industries and their abatement techniques It also provides details of energy management in metal industry and enumerates factors for metallurgical plant location and layout Furthermore it presents health and safety guidelines for metallurgical professionals The text concludes with discussion on basic legislations related to environment and labour This book is primarily designed for undergraduate students of metallurgical engineering Besides it will also be useful as a ready reference source to professionals associated with metallurgical industries

KEY FEATURES Coverage of various types of environmental issues such as air emission toxic effluents solid waste thermal discharge noise and radiation Analysis of renewable and non renewable energy sources on the earth with current energy usage pattern and future consumption pattern Description of various activities in the metallurgical units along with discussion of sources of pollution and abatement techniques Guidelines for the plant location and layout Basic information about labour health and safety environmental legislations labour laws ISO 14000 carbon credit etc

Mine Closure N.C. Saxena, 2008-09-01 Mining is basically an intermediate use of land and it causes various impacts on all the components of environment In most situations the impacts on land are severe and may cause the land to become useless for any economic use after mining Since the mining companies take land areas which have been in various uses before the onset of mining activities it should have been obligatory for the companies to develop the land areas for uses most suitable for the economic activities after mining Though this was known right from the inception of the mining activities the efforts towards developing the land after mining were negligible This has resulted in devastation of mined out land in many locations in the country Keeping in view the importance and the necessity of development of land areas legislation have been formulated for mine closure The legislation are recent not many mines have been closed in accordance with the provisions therein A lot of work is still required to be done to make mine closure really effective All over the world the importance of the mine closure is being realized due mainly to the following reasons Closure planning at all the stages in a mine s life is important to the economics of a mine and such a planning results in a large cost savings In this book the following aspects of mine closure planning and implementation in the opencast and underground mines with special reference to the mining situations in the India have been outlined

- 1 Impacts of mining on environmental components and their roles in mine closure planning
- 2 Legal social and economic necessity of mine closure
- 3 Land use planning as a tool for mine closure planning and implementation
- 4 How to incorporate mine closure in mine planning
- 5 Mine closure planning in underground and opencast mines
- 6 Implications of mine fires in mine closure
- 7 Mine closure planning for small mines
- 8 Taking care of the abandoned mines i e closure of abandoned mines
- 9 Economics of mine closure
- 10 Management of ecology during mine closure

The book is expected to be useful to the practical mining engineers and environmentalists in mine planning and design It should also be useful to the researchers and students of mining and

environment **Elements of Industrial Hazards** Ratan Raj Tatiya,2010-12-01 An introductory course on Health Safety and Environment HSE as applicable to all manufacturing and exploration engineering industries Its first part deals with fundamentals ecology and environmental engineering and covers air and water pollution sources magnitude measuring techniques and remedial measures to minimize them The second pa **TEXTBOOK OF ENVIRONMENTAL ENGINEERING** P. VENUGOPALA RAO,2002-01-01 Designed for a first course in environmental engineering for undergraduate engineering and postgraduate science students the book deals with environmental pollution and its control methodologies It explains the basic environmental technology environmental sanitation water supply waste management air pollution control and other related issues and presents a logical and systematic treatment of topics The book an outgrowth of author s long experience in teaching the postgraduate science and engineering students is presented in a student oriented approach It is interspersed with solved examples and illustrations to reinforce many of the concepts discussed and apprise the readers of the current practices in areas of water processing water distribution collection and treatment of domestic sewage and industrial waste water and control of air pollution It emphasizes fundamental concepts and basic appli cations of environmental technology for management of environmental problems Besides students the book will be useful to the academia of environmental sciences civil environmental engineering as well as to environmentalists and administrators working in the field of pollution control **Ecophysiology of Tropical Plants** Sachchidanand Tripathi,Rahul Bhadouria,Pratap Srivastava,Rishikesh Singh,Rajkumari Sanayaima Devi,2023-10-03 Plants in tropical regions are coping with enormous challenges of physiological stresses owing to changing environmental and climatic conditions Rapid growth of human population and rampant exploitation of fossil fuels and other developmental activities are actively contributing to such perturbations The Intergovernmental Panel on Climate Change has projected a sustained increase in carbon dioxide CO₂ emissions and thereby a rise in global temperature in the coming decades The resultant changes in precipitation patterns are now evident across the globe due to intensification of hydrological cycle Moreover gaseous and particulate pollutants are also an immense challenge for tropical plants Such vagaries in environmental conditions have significant impacts on the ecophysiological traits of plants resulting from altered interactions of tropical plants with each other as well as other biotic and abiotic components within the ecosystem Books available in the market that particularly focus on ecophysiological responses of tropical plants to abiotic and biotic environmental factors under climate change are limited This book intends to fill this knowledge gap and provides a detailed analysis on ecophysiological responses of tropical plants to these environmental challenges as well as suggesting some approachable measures for plant adaptations to these challenges The book is equally applicable to undergraduate and postgraduate students researchers teachers and forest managers and policy makers Salient features of the book are A comprehensive discussion on adaptive mechanisms of plants through their ecophysiological responses to various biotic and abiotic stresses Elaboration on the recent techniques involved in

ecophysiological research A detailed account of evolutionary responses of plants to changing climate Discussion of recent research results and some pointers to future advancements in ecophysiological research Presentation of information in a way that is accessible for students researchers and teachers practicing in plant physiology and ecology Tropical Ecosystems,1992 **Environment and Development** Jagbir Singh,2005 In the last 100 years mankind has managed to destroy much of what it took nature millions of years to create At no point in history has so much damage been done to our natural heritage in such a short amount of time If something needed to be done to stop this crime against our future generations then now is the time to act as with every passing day we are speeding towards a self inflicted doomsday What is killing our ecology and environment is generally known What we need are solutions and ways of implementing them This International Conference on Environment and Development Challenges and Opportunities held on March 4 6 2005 at the University of Delhi India is one such step The conference presented the most up to date ideas on solving problems both ecological and environmental which mankind has brought upon itself Literature Review on Solid Waste Management Practices in India Dr. K.
