- **Flowsheet Development :** We have to think multiple routes for producing products and selecting one
- **Design the equipment :** It wants to satisfy the **economic analysis** (Operating cost and capital cost). It gives the idea how much profit it will make. But it can be possible only after designing the equipment.
- **Economic analysis :**
- **Optimization –** It is the process of Maximize the profit and minimize the losses. The condition where we will get maximum throughput. For ex. – Considering Capital cost & Operating cost = Total cost. Minimizing the total cost is the process of Optimization.
- **Reporting:** We have to prepare all the above parameters and report it.

Nature of Design:

It is the Imagination activity to complete the process Like a way of thinking in different diagonals.

Design Objectives: What will be the raw materials and so on...! It is in the hand of designer what process he have to consider
