Handbook of Fire & Explosion Protection Engineering Principles for Oil, Gas, Chemical, & Related Facilities

Dennis P. Nolan, 1996-12-31 The security and economic stability of many nations and multinational oil companies are highly dependent on the safe and uninterrupted operation of their oil gas and chemical facilities One of the most critical impacts that can occur to these operations are fires and explosions from accidental or political incidents This publication is intended as a general engineering handbook and reference guideline for those personnel involved with fire and explosion protection aspects of critical hydrocarbon facilities Design guidelines and specifications of major small and independent oil companies as well as information from engineering firms and published industry references have been reviewed to assist in its preparation Some of the latest published practices and research into fire and explosions have also been mentioned

Guidelines for Siting and Layout of Facilities CCPS (Center for Chemical Process Safety), 2018-04-20 This book has been written to address many of the developments since the 1st Edition which have improved how companies survey and select new sites evaluate acquisitions or expand their existing facilities This book updates the appendices containing both the recommended separation distances and the checklists to help the teams obtain the information they need when locating the facility within a community when arranging the processes within the facility and when arranging the equipment within the process units
