Table E.1 – RLB Report Summary of Amounts with Index of Figures

- (1) The RLB report did not include replacement of existing asphalt as described in 2.7 Site and Building Systems. An amount of \$172,317 (based on 32,000SF @ \$3.75/SF, with mark-ups) has been added to the RLB Site cost estimate.
- (2) Line G3020-76 has an incorrect area – area should be 6,700 SF. The cost difference, with associated markups, has been deducted from the RLB Administration cost estimate.
- (3) This item was not provided with the RLB report. The amount included is based on a similar structure in Aspen (with escalation).

This estimate is based on the current, conceptual understanding of the project. This level of estimating is affected by the significant potential to under-react to cost issues, as well as to over-react based on a limited amount of information. A prudent, and conservative approach is used. Nonetheless, the actual costs may vary as the project is developed further. Factors that can increase costs include: the economy, additional detailed drawings and definition of systems, scope packaging, contract award timing, and scope revisions. Factors that can improve costs include: the economy, additional detailed drawings and definition of systems, and competitive pricing by the Design-Build Contractor.
