Architecture And Violence:

Architecture and Violence Bechir Kenzari, 2011 In today's turbulent times few subjects deserve a closer scrutiny than the interactions between violence and constructed environment Modernity's contradictory histories laid bare the fact that it is impossible to consider architecture simply a benign passive victim of humanity's violent vices Built space is as capable of incarnating violent acts as enacting them disciplining and silencing the subject in the process In this compelling volume some of the most incisive thinkers of contemporary architectural theory make manifest the intricacies of interrelations between architecture and violent events Employing a wide variety of perspectives and methodical approaches the authors examine some of the most dramatic and unexpected instances of these vexing relations Back cover

Spatial Violence Andrew Herscher, Anooradha Siddiqi, 2018-02-02 This book poses spatial violence as a constitutive dimension of architecture and its epistemologies as well as a method for theoretical and historical inquiry intrinsic to architecture and thereby offers an alternative to predominant readings of spatial violence as a topic event fact or other empirical form that may be illustrated by architecture Exploring histories of and through architecture at sites across the globe the chapters in the book blur the purportedly distinctive borders between war and peace framing violence as a form of social political and economic order rather than its exceptional interruption Regarding space and violence as co constitutive the book's collected essays critique modernization and capitalist accumulation as naturalized modes for the extraction of violence from everyday life Focusing on the mediation of violence through architectural registers of construction destruction design use representation theory and history the book suggests that violence is not only something inflicted upon architecture but also something that architecture inflicts In keeping with Walter Benjamin's formulation that there is no document of civilization that is not also a document of barbarism the book offers spatial violence as another name for architecture itself This book was previously published as a special issue of *Architectural Theory Review*

durations the case studies in this volume include the analysis of the shrapnel fragments in a room struck by drones in Pakistan the reconstruction of a contested shooting in the West Bank the architectural recreation of a secret Syrian detention center from the memory of its survivors a blow by blow account of a day long battle in Gaza and an investigation of environmental violence and climate change in the Guatemalan highlands and elsewhere Weizman s Forensic Architecture stunning and shocking in its critical narrative powerful images and daring investigations presents a new form of public truth technologically architecturally and aesthetically produced The practice calls for a transformative politics in which architecture as a field of knowledge and a mode of interpretation exposes and confronts ever new forms of state violence and secrecy

Architecture and Freedom Owen Hopkins, 2018-05-29 Architects are facing a crisis of agency For decades they have seen their traditional role diminish in scope as more and more of their responsibilities have been taken over by other disciplines within the building construction industry Once upon a time we might have seen the architect as the conductor of the orchestra now he or she is but one cog in a vast and increasingly complex machine In an attempt to find a way out of this crisis there is growing debate about how architects might reassert the importance of their role and influence On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline s core mission of advancing social progress and promoting the public good and at the same time the scope of their traditional disciplinary remit At root this question is fundamentally about freedom about whether architects still possess it if they have ever done and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice Presenting a variety of views and perspectives this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century Contributors include Phillip Bernstein Peggy Deamer Adam Nathaniel Furman Kate Goodwin Charles Holland Anna Minton Patrik Schumacher Alex Scott Whitby Ines Weizman and Sarah Wigglesworth Featured architects Atelier Kite ScottWhitbyStudio C S Architects Anupama Kundoo Noero Architects

Umbrellium and Zaha Hadid Architects *Violence Taking Place* Andrew Herscher, 2010-03-25 While the construction of architecture has a place in architectural discourse its destruction generally seen as incompatible with the very idea of culture has been neglected in theoretical and historical discussion Responding to this neglect Herscher examines the case of the former Yugoslavia and in particular Kosovo where targeting architecture has been a prominent dimension of political violence Rather than interpreting violence against architecture as a mere representation of deeper social political or ideological dynamics Herscher reveals it to be a form of cultural production irreducible to its contexts and formative of the identities and agencies that seemingly bear on it as causes Focusing on the particular sites where violence is inflicted and where its subjects and objects are articulated the book traces the intersection of violence and architecture from socialist modernization through ethnic and nationalist conflict to postwar reconstruction **Architectural Theory, Volume 2** Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco Prussian war of 1871 until the end of the twentieth century The entire two volume anthology follows the full range of architectural literature from classical times to present transformations An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China sea Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory Places the work of starchitects like Koolhaas Eisenman and Lyn alongside the work of prominent architectural critics offering a balanced perspective on current debates Includes many hard to find texts and works never previously translated into English Alongside Volume I An Anthology from Vitruvius to 1870 creates a stunning overview of architectural theory from early antiquity to the twenty first century *Architecture and Disjunction* Bernard Tschumi, 1996-02-28 Avant garde theorist and architect Bernard Tschumi is equally well known for his writing and his practice Architecture and Disjunction which brings together Tschumi s essays from 1975 to 1990 is a lucid and provocative analysis of many of the key issues that have engaged architectural discourse over the past two decades from deconstructive theory to recent concerns with the notions of event and program The essays develop different themes in contemporary theory as they relate to the actual making of architecture attempting to realign the discipline with a new world culture characterized by both discontinuity and heterogeneity Included are a number of seminal essays that incited broad attention when they first appeared in magazines and journals as well as more recent and topical texts Tschumi s discourse has always been considered radical and disturbing He opposes modernist ideology and postmodern nostalgia since both impose restrictive criteria on what may be deemed legitimate cultural conditions He argues for focusing on our immediate cultural situation which is distinguished by a new postindustrial unhomeliness reflected in the ad hoc erection of buildings with

multipurpose programs The condition of New York and the chaos of Tokyo are thus perceived as legitimate urban forms
Architectural Record of Design and Construction, 1930 Metaphoric Architecture Michael C. Abrams, 2025-07-14
Metaphoric Architecture focuses on a fundamental but often challenging part of the beginning design phases how to take an abstract idea and transform it into a three dimensional object space or building Through media experimentation analysis of innovative case studies and hands on exercises Abrams guides the reader through the early stages of design which include site and precedent analysis among other initial approaches To comprehend design thinking the visual arts music and film are examined in relation to architecture Chapters demonstrate how abstract ideas inspired by paintings music and films can be utilized in the spatial design process and transformed into habitable spaces There are 22 exercises that increase in complexity to strengthen students abilities and promote the use of digital and manual representation in a back and forth motion With 444 illustrations this book demystifies the process of designing 3D form and space in a highly visual way It will be the ideal studio companion for beginning and intermediate students of both architecture and interior design with a wide range of architectural lessons that include abstraction design fundamentals concept development building design case study analysis and site to building relationships *Unliveable Spaces* Runa Johannessen, 2017 **The Works of John Ruskin: Lectures on architecture and painting (Edinburgh, 1853)** John Ruskin, 1904 Volume 1 35 works Volume 36 37 letters Volume 38 provides an extensive bibliography of Ruskin s writings and a catalogue of his drawings with corrections to earlier volumes in George Allen s Library Edition of the Works of John Ruskin Volume 39 general index **Works of John Ruskin: Seven lamps of architecture.
