*Blade Runner* is a 1982 American dystopian science fiction thriller film directed by Ridley Scott and starring Harrison Ford, Rutger Hauer, Sean Young and Edward James Olmos. The screenplay, written by Hampton Fancher and David Peoples, is loosely based on the novel *Do Androids Dream of Electric Sheep?* by Philip K. Dick.

The film depicts a dystopian Los Angeles in November 2019 in which genetically engineered organic robots called replicants—visually indistinguishable from adult humans—are manufactured by the powerful Tyrell Corporation as well as by other "mega-corporations" around the world. Their use on Earth is banned and replicants are exclusively used for dangerous, menial or leisure work on off-world colonies. Replicants who defy the ban and return to Earth are hunted down and "retired" by police special operatives known as "Blade Runners". The plot focuses on a brutal and cunning group of recently escaped replicants hiding in Los Angeles and the burnt-out expert Blade Runner, Rick Deckard (Harrison Ford), who reluctantly agrees to take on one more assignment to hunt them down.

*Blade Runner* initially polarized critics; some were displeased with the pacing, while others enjoyed its thematic complexity. The film performed poorly in North American theaters but has since become a cult film.<sup>[2]</sup> It has been hailed for its production design, depicting a "retrofitted" future,<sup>[3]</sup> and remains a leading example of the neo-noir genre. It brought the work of Philip K. Dick to the attention of Hollywood and several later films were based on his work.<sup>[4]</sup> Ridley Scott regards *Blade Runner* as "probably" his most complex and personal film. In 1993, the film was selected for preservation in the United States National Film Registry by the Library of Congress as being "culturally,

Ecer, Jacques Periaux, 2001-04-27 Parallel CFD 2000 the Twelfth in an International series of meetings featuring computational fluid dynamics research on parallel computers was held May 22 25 2000 in Trondheim Norway Following the trend of the past conferences areas such as numerical schemes and algorithms tools and environments load balancing as well as interdisciplinary topics and various kinds of industrial applications were all well represented in the work presented In addition for the first time in the Parallel CFD conference series the organizing committee chose to draw special attention to certain subject areas by organizing a number of special sessions We feel the emphasis of the papers presented at the conference reflect the direction of the research within parallel CFD at the beginning of the new millennium It seems to be a clear tendency towards increased industrial exploitation of parallel CFD Several presentations also demonstrated how new insight is being achieved from complex simulations and how powerful parallel computers now make it possible to use CFD within a broader interdisciplinary setting Obviously successful application of parallel CFD still rests on the underlying fundamental principles Therefore numerical algorithms development tools and parallelization techniques are still as important as when parallel CFD was in its infancy Furthermore the novel concepts of affordable parallel computing as well as

metacomputing show that exciting developments are still taking place As is often pointed out however the real power of parallel CFD comes from the combination of all the disciplines involved Physics mathematics and computer science This is probably one of the principal reasons for the continued popularity of the Parallel CFD Conferences series as well as the inspiration behind much of the excellent work carried out on the subject We hope that the papers in this book both on an individual basis and as a whole will contribute to that inspiration Further details of Parallel CFD 99 as well as other conferences in this series are available at <http://www.parcfd.org>

**Hydroelectric Machinery** Peter Dörfler, Mirjam Sick, André Coutu, 2012-08-28 Since the 1970 s an increasing amount of specialized research has focused on the problems created by instability of internal flow in hydroelectric power plants However progress in this field is hampered by the interdisciplinary nature of the subject between fluid mechanics structural mechanics and hydraulic transients Flow induced Pulsation and Vibration in Hydroelectric Machinery provides a compact guidebook explaining the many different underlying physical mechanisms and their possible effects Typical phenomena are described to assist in the proper diagnosis of problems and various key strategies for solution are compared and considered with support from practical experience and real life examples The link between state of the art CFD computation and notorious practical problems is discussed and quantitative data is provided on normal levels of vibration and pulsation so realistic limits can be set for future projects Current projects are also addressed as the possibilities and limitations of reduced scale model tests for prediction of prototype performance are explained Engineers and project planners struggling with the practical problems will find Flow induced Pulsation and Vibration in Hydroelectric Machinery to be a comprehensive and convenient reference covering key topics and ideas across a range of relevant disciplines

*Drawing Futures* Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

diverse backgrounds and philosophical perspectives Among the issues addressed in the book What does Blade Runner 2049 tell us about the interactions of state power and corporate power Can machines ever become truly conscious or will they always lack some essential human qualities The most popular theory of personhood says that a person is defined by their memories so what happens when memories can be manufactured and inserted at will We already interact with non human decision makers via the Internet When embodied AI becomes reality how can we know what is human and what is simulation Does it matter Do AI endowed human looking replicants have civil and political rights or can they be destroyed whenever real humans decide they are inconvenient The blade runner Deckard Harrison Ford appears in both movies and is generally assumed to be human but some claim he may be a replicant What s the evidence on both sides Is Niander Wallace the mad scientist cum evil corporate CEO in Blade Runner 2049 himself a replicant What motivates him What are the impacts of decision making AI entities on the world of business Both Blade Runner and Blade Runner 2049 have been praised for their hauntingly beautiful depictions of a bleak future but the two futures are very different and the 2019 future imagined in the original Blade Runner is considerably different from the actual world of 2019 How have our expectations and visions of the future changed between the two movies The dream maker character Ana Stelline in Blade Runner 2049 has a small but pivotal role What are the implications of a person whose dedicated mission and task is to invent and install false memories What are the social and psychological implications of human AI sexual relations
