High School Department Bulletins University of the State of New York, 1900 Contains proceedings of various teachers associations academic examination papers etc *Healthy, Resilient, and Sustainable Communities After Disasters* Institute of Medicine, Board on Health Sciences Policy, Committee on Post-Disaster Recovery of a Community's Public Health, Medical, and Social Services, 2015-09-10 In the devastation that follows a major disaster there is a need for multiple sectors to unite and devote new resources to support the rebuilding of infrastructure the provision of health and social services the restoration of care delivery systems and other critical recovery needs In some cases billions of dollars from public private and charitable sources are invested to help communities recover National rhetoric often characterizes these efforts as a return to normal But for many American communities pre disaster conditions are far from optimal Large segments of the U S population suffer from preventable health problems experience inequitable access to services and rely on overburdened health systems A return to pre event conditions in such cases may be short sighted given the high costs both economic and social of poor health Instead it is important to understand that the disaster recovery process offers a series of unique and valuable opportunities to improve on the status quo Capitalizing on these opportunities can advance the long term health resilience and sustainability of communities thereby better preparing them for future challenges *Healthy Resilient and Sustainable Communities After Disasters* identifies and recommends recovery practices and novel programs most likely to impact overall community public health and contribute to resiliency for future incidents This book makes the case that disaster recovery should be guided by a healthy community vision where health considerations are integrated into all aspects of recovery planning before and after a disaster and funding streams are leveraged in a coordinated manner and applied to health improvement priorities in order to meet human recovery needs and create healthy built and natural environments The conceptual framework presented in *Healthy Resilient and Sustainable Communities After Disasters* lays the groundwork to achieve this goal and provides operational guidance for multiple sectors involved in community planning and disaster recovery *Healthy Resilient and Sustainable Communities After Disasters* calls for actions at multiple levels to facilitate recovery strategies that optimize community health With a shared healthy community vision strategic planning that prioritizes health and coordinated implementation disaster recovery can result in a communities that are healthier more livable places for current and future generations to grow and thrive communities that are better prepared for future adversities

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer

Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

Electric-Shock Weapons, Tasers and Policing Abi Dymond,2021-10-24 Building on five years of research and drawing on criminology science and technology studies STS socio legal studies and social psychology this book is the first non medical book written on electric shock weapons of which the best well known is the TASER brand The police s ability to use force is one of their most crucial powers yet one that has been relatively neglected by criminology This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike Drawing on STS it also considers the role and impact of electric shock technologies examines the extent to which technologies and non human agency may also play a role in shaping officer decision making and discretion and contributes to long standing debates about police accountability This is essential reading for policing scholars around the world particularly those engaged with use of force culture and accountability as well as those engaged with Science and Technology studies **Index of the Christian Science Monitor** ,1964 **Smog in our brains: Gender differences in**

the impact of exposure to air pollution on cognitive performance in China Chen, Xi,Zhang, Xiaobo,Zhang, Xin,2017-03-11 While there is a large body of literature on the negative health effects of air pollution there is much less written about its effects on cognitive performance for the whole population This paper studies the effects of contemporaneous and cumulative exposure to air pollution on cognitive performance based on a nationally representative survey in China By merging a longitudinal sample at the individual level with local air quality data according to the exact dates and counties of interviews we find that contemporaneous and cumulative exposure to air pollution impedes both verbal and math scores of survey subjects Interestingly the negative effect is stronger for men than for women Specifically the gender difference is more salient among the old and less educated in both verbal and math tests *Palmer's Index to "The Times" Newspaper* ,1896 *Publishers' circular and booksellers' record* ,1873 **The Publishers' Circular and General Record of British and Foreign Literature** ,1873 *Pacific Builder & Engineer* ,1918 **Los Angeles Times** ,1975
