About PLCs

PLCs were developed to provide a means of controlling manufacturing processes through relays. For more information, see www.rockwellautomation.com.

A PLC is a computerized device that can be programmed to perform a variety of tasks. It is designed to be used in harsh environments, including dust, vibration, and temperature extremes. They accept a flow of data in the form of digital signals, store the data, and execute the program. They are designed to be used in a variety of applications, including manufacturing, material handling, and process control.

Modern PLCs are often used in a variety of applications. They can be used for simple and intermediate control tasks, as well as for complex and advanced control tasks.

The range of PLCs available is very large. However, the most common PLCs are the Allen-Bradley 1756 series PLCs. These PLCs are designed to be used in a variety of applications, including manufacturing, material handling, and process control.

One of the most popular PLCs is the Allen-Bradley 1756 series PLC. This PLC is designed to be used in a variety of applications, including manufacturing, material handling, and process control. It is a modular PLC, which means that it can be configured to meet the needs of a specific application.
