**Clinical Exercise Electrocardiography** Shel Levine, Brian J. Coyne, Lisa Cooper Colvin, 2015-02-13 Clinical Exercise Electrocardiography addresses the needs of exercise physiologists working in a clinical setting and highlights static interpretation and rhythm strips and 12 leads Not only does it include the traditional basic electrocardiography ECG arrhythmia myocardial infarction and pacemaker chapters it also provides easy to read chapters on cardiac pathophysiology cardiovascular testing procedures cardiac pharmacology and structural health disease and inflammatory processes The authors also address the differences in ECG interpretation in women children and athletes and examine the use of ECGs in exercise stress testing situations

**Academic Bildung in Net-based Higher Education** Trine Fosslund, Helle Mathiasen, Mariann Solberg, 2015-02-11 The explosive emergence of net based learning in higher education brings with it new possibilities and constraints in teaching and learning environments This edited collection considers how the concept of Academic Bildung a term suggesting a personal educational process beyond actual educational learning can be applied to net based higher education The book is drawing on Scandinavian research to address the topic from both a theoretical and practical standpoint Chapters explore the facilitation of online courses and argue how and why universities should involve dimensions of Academic Bildung on both a strategic and technological pedagogical content level The book is structured in three parts Part I frames the current state of net based learning and introduces Bildung as a concept Part II contains a set of four case studies in Norway Sweden and Denmark also including a fifth study that looks at Scandinavian approaches to teaching and learning in comparison with data from the USA the UK Australia and Canada Part III provides a synthesis of theories and cases to examine whether a Scandinavian orientation can be discerned Contributions suggest that in order to address one of the fundamental functions of higher education the ability to produce new knowledge the Academic Bildung of the students has to be in focus Grounded in theoretical and empirical discussion this book will appeal to researchers and academics in the field of higher education as well as personnel who work with teaching and learning with technology and academics interested in the question of Academic Bildung

**Reconstituting the Curriculum** M. R. Islam, Gary M. Zatzman, Jaan S. Islam, 2013-11-13 Based on groundbreaking new ideas this treatise signals a return to a rebuilding and reshaping of the curriculum as the primary tool for education This book presents a new definition of curriculum and what it should consist of with a view toward creating a more ethical educated and thinking person Rather than treating students as products for society this approach returns to a view of the curriculum as a tool for educating students to reason through problems be bold in creating new solutions and contribute to a more vibrant just world The university curriculum introduced in the post Renaissance era dominated by doctrinal philosophy is based on learning or skill development suitable for creating a learned society that would eventually serve the establishment This curriculum has been promoted as the only form suitable for the modern education system It has introduced a tremendous amount of tangible advancement in all fields of the

structured education system These tangible gains are often promoted as knowledge This has created confusion between education acquiring knowledge and learning training or skill development This book seeks to clarify the difference between these two divergent views of education It has been shown that the current curriculum is not conducive to increasing a student's knowledge because it is based on consolidating preconceived ideas that have been either passed on from previous generations or gained through personal experience In most cases this mode of cognition will not create a pathway for gaining knowledge that brings one closer to discovery The term education on the other hand is always meant to be a process of bringing forth one's inherent qualities and unique traits necessary and sufficient for increasing one's knowledge
