

The background is an abstract painting. The top portion features a textured, light-colored sky in shades of green, blue, and yellow. Below this is a dark, jagged horizon line. The lower two-thirds of the image is dominated by a large, vibrant red field, which has a slightly grainy texture. The red field transitions into a dark, almost black, area at the bottom.

The Affect Theory Reader Melissa Gregg, Gregory J. Seigworth, 2010-11-12 A collection of essays on affect theory by groundbreaking scholars in the field *The Affect Theory Reader 2* Gregory J. Seigworth, Carolyn Pedwell, 2023-09-15 Building on the foundational Affect Theory Reader this new volume gathers together contemporary scholarship that highlights and interrogates the contemporary state of affect inquiry Unsettling what might be too readily taken for granted assumptions in affect theory The Affect Theory Reader 2 extends and challenges how contemporary theories of affect intersect with a wide range of topics and fields that include Black studies queer and trans theory Indigenous cosmologies feminist cultural analysis psychoanalysis and media ecologies It foregrounds vital touchpoints for contemporary studies of affect from the visceral elements of climate emergency and the sensorial sinews of networked media to the minor feelings entangled with listening looking thinking writing and teaching otherwise Tracing affect's resonances with today's most critical debates The Affect Theory Reader 2 will reorient and disorient readers to the past present and future potentials of affect theory Contributors Lauren Berlant Lisa Blackman Rizvana Bradley Ann Cvetkovich Ezekiel J Dixon Román Adam J Frank M Gail Hamner Omar Kasmani Cecilia Macón Hil Malatino Erin Manning Derek P McCormack Patrick Nickleson Susanna Paasonen Tyrone S Palmer Carolyn Pedwell Jasbir K Puar Jason Read Michael Richardson Dylan Robinson Tony D Sampson Kyla Schuller Gregory J Seigworth Nathan Snaza Kathleen Stewart Elizabeth A Wilson

The New Media Theory Reader Robert Hassan, Julian Thomas, 2006-09 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon Studies in the Literary Imagination, 2018 **Journal of Dramatic Theory and Criticism**, 2013 *Story Structure and Reader Affect in American and Hungarian Short Stories* William F. Brewer, 1986 **Affect Theory and Literary Critical Practice** Stephen Ahern, 2018-12-31 Affect Theory and Literary Critical Practice develops new approaches to reading literature that are informed by the insights of scholars working in affect studies across many disciplines with essays that consider works of fiction drama poetry and memoir ranging from the medieval to the postmodern While building readings of representative texts contributors reflect on the value of affect theory to literary critical practice asking what explanatory power is affect theory affording me here as a critic what can the insights of the theory help me do with a text Contributors work to incorporate lines of theory not always read together accounting for the affective intensities that circulate through texts and readers and tracing the operations of affectively charged social scripts Drawing variously on queer feminist and critical race theory and informed by ecocritical and new materialist sensibilities essays in the volume share a critical practice founded in an ethics of relation and contribute to an emerging postcritical moment Border Crossing and Reader Reception in "The Emperor's Babe", "Mr. Loverman" and "Girl, Woman, Other" by Bernardine Evaristo

Marnie Hensler, 2021-09-21 Master's Thesis from the year 2021 in the subject English Language and Literature Studies Literature grade 1.0 University of Freiburg English Department language English abstract This paper uses both distant and close reading methods to analyse reader reception of Bernardine Evaristo's works *The Emperor's Babe*, *Mr Loverman* and her Booker Award winning publication *Girl Woman Other*. Through experimental form and style, approachable characters and humorous style of writing, Evaristo successfully draws the contemporary reader into the story world and educates her on the constructedness of cognitive borders and social categorizations: sex, gender, age, race, class, et cetera. After the reader crosses the border into the story world, she follows the individual journeys of the fictional characters with the help of mind reading and narrative empathy and leaves the story world with differences in cognitive processing followed by effects on cognition, perception and action. To empirically analyse the educational border crossing effect of a literary work that reaches beyond the reading experience, this paper uses reception data from Goodreads in the form of reader profile information and reviews on *The Emperor's Babe*, *Mr Loverman* and *Girl Woman Other*. After a theoretical introduction to the historic development of the academic interest in both border and empirical reception studies, the results section will outline the major findings of a descriptive statistical analysis of the retrieved data for the reception of all novels. Each novel's reception will then be looked at individually through distant and close reading of the respective book's narrative techniques. A discussion section will compare the findings of the distant and close readings of all three books under discussion. The paper will close with a critical summary of the findings in the conclusion and give an outlook on the advantages and opportunities provided by the study of the subversive border crossing effects of literature in general. The influence of fiction on a reader's personal life and social cognition has been of interest to academia ever since the beginnings of reader response criticism and the cognitive turn of the 1980s. Literature after all has the power to serve as a springboard for subversive thought, the precursory movement of a transformation of social and cultural structures. Reader response and reception theorists, cognitive literary critics and empirical receptionists have thus been trying to empirically explain the transformative, subversive powers of literature.

Affect Theory and Early

Modern Texts Amanda Bailey, Mario DiGangi, 2017-03-22 The first book to put contemporary affect theory into conversation with early modern studies, this volume demonstrates how questions of affect illuminate issues of cognition, political agency, historiography and scientific thought in early modern literature and culture. Engaging various historical and theoretical perspectives, the essays in this volume bring affect to bear on early modern representations of bodies, passions and social relations by exploring the role of embodiment in political subjectivity and action, the interactions of human and non-human bodies within ecological systems and the social and physiological dynamics of theatrical experience. Examining the complexly embodied experiences of leisure, sympathy, staged violence, courtiership, envy, suicide and many other topics, the contributors open up new ways of understanding how Renaissance writers thought about the capacities, pleasures and vulnerabilities of
