**Software, Copyright, and Competition** Anthony

L. Clapes, 1989-11-06 This book deals comprehensively with the question of the scope of copyright protection for computer programs Offering a unique blend of scholarship technical rigor and readability it dispels the confusion and controversy that surround the application of copyright law to computer programs Through an orderly development of facts and analysis it shows why the copyright law is the appropriate regime for software protection and explains the nature of copyright protection for software Alternating between essay format and case study the book provides expert counsel to those interested in this interface between technology and law Software Copyright and Competition The Look and Feel of the Law is undoubtedly one of the best pieces of legal scholarship in any subject this editor has ever had the pleasure to read As to its subject matter it is the best analysis of look and feel written to date The book is very readable Not only does the author explain the law for the non lawyer but he explains the zen of computer programming to the non programmer With wit and insight he puts to rest the many old wives tales the legal community believes about programmers In the best of all possible worlds this book would be mandatory reading for any judge or arbitrator faced with a look and feel case The Software Law Bulletin January 1990 Two forces innovation and imitation fuel the intense competition that underlies the dramatic technological progress taking place in the computer industry As the competitive battleground shifts increasingly to the

software sector a vigorous debate has arisen over whether the principal legal regime for protecting the asset value of computer programs the copyright law encourages or inhibits that competition Industry executives computer lawyers law professors and lawmakers alike are participating in the debate the outcome of which will quite literally shape the future of the computer industry This book deals comprehensively with the question of the scope of copyright protection for computer programs Offering a unique blend of scholarship technical rigor and readability it dispels the confusion and controversy that surround the application of copyright law to computer programs Through an orderly development of facts and analysis it shows why the copyright law is the appropriate regime for software protection and explains the nature of copyright protection for software Alternating between essay format and case study the book provides expert counsel to those interested in this interface between technology and law Euro-Par 2007 Workshops: Parallel Processing Luc Bougé, Martti Forsell, Jesper Larsson Träff, Achim Streit, Wolfgang Ziegler, Michael Alexander, Stephen Childs, 2008-03-08

Parallel and distributed processing although within the focus of computer science research for a long time is gaining more and more importance in a wide spectrum of applications These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields and attempt to spark interest in novel research directions to advance the embracing model of high performance computing research in general The objective of these workshops is to specifically address researchers coming from university industry and governmental research organizations and application oriented companies in order to close the gap between purely scientific research and the applicability of the research ideas to real life problems Euro Par is an annual series of international conferences dedicated to the promotion and advancement of all aspects of parallel and distributed computing The 2007 event was the 13th issue of the conference Euro Par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing both as an industrial technique and an academic discipline extending the frontier of both the state of the art and the state of the practice Since 2006 Euro Par offers researchers the chance to colocate advanced technical workshops back to back with the main conference This is for a mutual benefit the workshops can take advantage of all technical and social facilities which are set up for the conference so that the organizational tasks are kept to a minimal level the conference can rely on workshops to experiment with specific areas of research which are not yet mature enough or too specific to lead to an official full edged topic at the conference **Soil and Crop Sensing for Precision Crop**

**Production** Minzan Li, Chenghai Yang, Qin Zhang, 2022-09-07 Soil and crop sensing is a fundamental component and the first important step in precision agriculture Unless the level of soil and crop variability is known appropriate management decisions cannot be made and implemented In the last few decades various ground based sensors have been developed to measure spatial variability in soil properties and nutrients crop growth and yield and pest conditions Remote sensing as an important data collection tool has been increasingly used to map soil and crop growth variability as spatial spectral and

temporal resolutions of image data have improved significantly in recent years While identifying spatial variability of soil and crop growth within fields is an important first step towards precision management using that variability to formulate variable rate application plans of farming inputs such as fertilizers and pesticides is another essential step in precision agriculture The purpose of this book is to present the historical current and future developments of soil and crop sensing technologies with fundamentals and practical examples The first chapter gives an overview of soil and crop sensing technologies for precision crop production The next six chapters provide details on theories methods practical applications as well as challenges and future research needs for all aspects of soil and crop sensing The last two chapters show how soil and crop sensing technologies can be used for plant phenotyping and precision fertilization The chapters are written by some of the world s leading experts who have contributed significantly to the developments of precision agriculture technologies especially in the area of soil and crop sensing They use their knowledge experiences and successful stories to present informative and up to date information on relevant topics Therefore this book is an invaluable addition to the literature and can be used as a reference by scientists engineers practitioners and college students for the dissemination and advancement of precision agriculture technologies for practical applications
