   Artificial Intelligence and Expert Systems I. Gupta,G. Nagpal,2020-04-20 No detailed description available for Artificial Intelligence and Expert Systems   *ARTIFICIAL INTELLIGENCE: BUILDING INTELLIGENT MACHINES* DR. ABHIJIT HALKAI,DR VIJAYALAKSHMI CHINTAMANENI,V. ARUNKUMAR,2025-12-06 Artificial Intelligence AI has emerged as one of the most transformative fields of modern science and technology revolutionizing the way humans interact with machines This textbook is designed to introduce students to the fundamental concepts techniques and applications of AI in a clear and structured manner It covers the evolution of AI from its historical roots to its current advancements in problem solving knowledge representation learning systems and expert systems The book aims to provide both theoretical understanding and practical insights into how intelligent systems are designed and implemented It serves as a valuable guide for students educators and enthusiasts eager to explore the fascinating world of artificial intelligence and its real world impact across industries Each chapter includes clear explanations examples and illustrations to simplify technical concepts and encourage self learning The text also highlights the practical applications of AI in modern industries like healthcare finance communication and automation showing how intelligent systems are shaping the future By studying this book readers will not only gain academic knowledge but also develop analytical thinking and problem solving skills essential for success in the AI driven era The preparation of this textbook has been guided by the vision of making Artificial Intelligence accessible and engaging to learners from diverse backgrounds It combines theoretical depth with real world relevance ensuring that readers can connect classroom learning with practical applications The content has been organized to promote curiosity creativity and critical thinking qualities that are essential for innovation in the rapidly evolving field of AI It is hoped that this book will inspire students to explore further research contribute to technological advancements and use AI responsibly for the betterment of society   *The Digital Mind* Arlindo Oliveira,2017-03-17 How developments in science and technology may enable the emergence of purely digital minds intelligent machines equal to or greater in power than the human brain What do computers cells and brains have in common Computers are electronic devices designed by humans cells are biological entities crafted by evolution brains are the containers and creators of our minds But all are in one way or another information processing devices The power of the human brain is so far unequaled by any existing machine or known living being Over eons of evolution the brain has enabled us to develop tools and technology to make our lives easier Our brains have even allowed us to develop computers that are almost as powerful as the human brain itself In this book Arlindo Oliveira describes how advances in science and technology could enable us to create digital minds Exponential growth is a pattern built deep into the scheme of life but technological change now promises to outstrip even evolutionary change Oliveira describes technological and scientific advances that range from the discovery of laws that control the behavior of the electromagnetic fields to the development of computers He calls natural selection the ultimate algorithm discusses genetics

and the evolution of the central nervous system and describes the role that computer imaging has played in understanding and modeling the brain Having considered the behavior of the unique system that creates a mind he turns to an unavoidable question Is the human brain the only system that can host a mind If digital minds come into existence and Oliveira says it is difficult to argue that they will not what are the social legal and ethical implications Will digital minds be our partners or our rivals   **Modeling and Optimization of Signals Using Machine Learning Techniques** Chandra Singh,Rathishchandra R. Gatti,K.V.S.S.S.S. Sairam,Manjunatha Badiger,Naveen Kumar S.,Varun Saxena,2024-08-23 Explore the power of machine learning to revolutionize signal processing and optimization with cutting edge techniques and practical insights in this outstanding new volume from Scrivener Publishing Modeling and Optimization of Signals using Machine Learning Techniques is designed for researchers from academia industries and R D organizations worldwide who are passionate about advancing machine learning methods signal processing theory data mining artificial intelligence and optimization This book addresses the role of machine learning in transforming vast signal databases from sensor networks internet services and communication systems into actionable decision systems It explores the development of computational solutions and novel models to handle complex real world signals such as speech music biomedical data and multimedia Through comprehensive coverage of cutting edge techniques this book equips readers with the tools to automate signal processing and analysis ultimately enhancing the retrieval of valuable information from extensive data storage systems By providing both theoretical insights and practical guidance the book serves as a comprehensive resource for researchers engineers and practitioners aiming to harness the power of machine learning in signal processing Whether for the veteran engineer scientist in the lab student or faculty this groundbreaking new volume is a valuable resource for researchers and other industry professionals interested in the intersection of technology and agriculture   Multisensor Fusion Rajive Joshi,Arthur C. Sanderson,1999 The fusion of information from sensors with different physical characteristics such as sight touch sound etc enhances the understanding of our surroundings and provides the basis for planning decision making and control of autonomous and intelligent machines The minimal representation approach to multisensor fusion is based on the use of an information measure as a universal yardstick for fusion Using models of sensor uncertainty the representation size guides the integration of widely varying types of data and maximizes the information contributed to a consistent interpretation In this book the general theory of minimal representation multisensor fusion is developed and applied in a series of experimental studies of sensor based robot manipulation A novel application of differential evolutionary computation is introduced to achieve practical and effective solutions to this difficult computational problem   *Integrated Flight/propulsion Control with Variable Rotor Speed Command for Rotorcraft* Stanford University. Department of Aeronautics and Astronautics,Takanori Iwata,1996   Heuristic Programming in Artificial Intelligence 3 Victor Allis,1992   In Our Own Image Maureen Caudill,1992 In a sweeping look at state of the art breakthroughs in artificial intelligence robotics computer science

psychology and neural networks neural networks expert Maureen Caudill reveals how close we are to achieving artificial vision language recognition problem solving memory and other requisites of intelligent robots She asserts that as our ability to make faster smaller cheaper computers blends with our ability to mimic the behavior of the human mind the first truly intelligent machines come closer to existence Yet she warns that there will likely be some unexpected and perhaps unpleasant consequences as androids will compete with humans for jobs and issues of ownership of an artificial being will come into play This fascinating book also prepares us for the day when we must learn to share the world with another intelligent species of our own creation   *Artificial Intelligence* Elaine Rich,Kevin Knight,1991 A revision of an established text for undergraduate and postgraduate Artificial Intelligence courses this text incorporates the latest research and methods **Using Constraint-based Heuristics to Satisfice Static Software Partitioning and Allocation of Heterogeneous Distributed Systems** Elizabeth Marie Sisley,1999   *An Intelligent, Coarse-to-fine Panoramic Imaging System Using a Real-time Interest Operator* Colin Patrick Barrows,1996   *Computer Aided Preliminary Design of Injection Molds Using Expert System Technology* Wen-Yen Wu,1987   **Interfaces to Database Systems (IDS92)** Richard Cooper,1993 Despite the volume of research carried out into the design of database systems and the design of user interfaces there is little cross fertilization between the two areas The control of user interfaces to database systems is therefore significantly less advanced than other aspects of DBMS design As database functionality is used in a wider range of areas such as design applications the suitability of the user interface is becoming increasingly important It is therefore necessary to begin applying the knowledge developed by HCI researchers to the specialised domain of database systems This volume contains revised papers from the International Workshop on Interfaces to Database Systems held in Glasgow 1 3 July 1992 The workshop aimed to develop an interaction between the design of database systems and user interfaces It discussed both the production of interfaces tailored to particular applications and also more general systems within which interfaces can be developed Some of the papers concentrate on usability aspects some discuss different interface metaphors whilst others tackle the question of designing a general conceptual model The latter topic is of particular importance as it is only by achieving an abstract model of what the user understands to be in the database that the data can be associated with appropriate interface facilities Among the contents of the volume are integrated interfaces to publicly available databases database query interface for medical information systems an integrated approach to task oriented database retrieval interfaces GRADI a graphical database interface for a multimedia DBMS cognitive view mechanism for multimedia information systems a graphical schema representation for object oriented databases a conceptual framework for error analysis in SQL interfaces a browser for a version entity relationship database Interfaces to Database Systems IDS92 is unique in that it brings together a variety of approaches from the database and HCI research communities It will provide essential reading for researchers of database systems and also industrial developers of DBMS   **Computers and Their Applications** Narayan C. Debnath,1998

Proceedings of the 19th Information Systems Research Seminar in Scandinavia ,1996   **Scientific and Technical Books and Serials in Print** ,1989   **Forthcoming Books** Rose Arny,2003   **Applied Computing** ,1993   **Proceedings** ,1990   **Choice** ,1987
