Gliff Ali Smith, 2025-02-04 From a literary master a moving and genre bending story about our era spanning search for meaning and knowing Set in an uncertain future where children are recruited by the surveillance state and new boundaries are drawn between people daily Gliff begins when two siblings Rose and Briar are deposited by their mother s partner Leif in an empty house in a city entirely new to them Left alone while Leif goes to get their mother the children must fend for themselves for the first time in their lives subsisting off canned goods and tentatively venturing into their new surroundings Their most constant companion a horse they ve found in the pasture out back a horse they name Gliff a horse slated to be taken to the slaughterhouse in a few days From a Scottish word meaning a transient moment or faint glimpse Gliff explores how and why we endeavour to make a mark on the world In a time when western industry wants to reduce us to algorithms and data something easily categorizable and predictable Smith shows us why our humanity our individual complexities matters more than ever *Rethinking Identities Across Boundaries* Claudia Capancioni, Mariaconcetta Costantini, Mara Mattoscio, 2023-11-22 This collection of essays aims to widen the current critique on borders by examining their entanglements with constructions of identity and disciplinary categories In particular it calls into question established models of gender notions of narrative genres and typological genera of borders in today s literary artistic philosophical and socio political discourse The chapters interrogate boundaries and boundary crossing not only in terms of geographical frontiers and the physical acts of trespassing but also as discursive constructs that police crossing subjects as gendered

subjects on the one hand and identify artistic genres and academic disciplines as fixed sealed in ways of understanding the world on the other Taking inspiration from the multiple meanings of the Italian word *genere* which stands for gender genre and typology *genus* simultaneously the volume reflects on the gendered narrative and typological nature of borders and border imagery and on the significance and potentialities of crossover phenomena taking place in borderlands in the fields of arts literature anthropology sociology and philosophy

Diffraction Reading Kai Merten, 2021-05-27 Putting the New Materialist figure of diffraction to use in a set of readings in which cultural texts are materially read against their contents and their themes against their readers or against other texts this volume proposes a critical intervention into the practice of reading itself In this book reading and reading methodology are probed for their materiality and re considered as being inevitably suspended between or diffracted with both matter and discourse The history of literary and cultural reading including poststructuralism and critical theory is revisited in a new light and opened up for a future in which the world and reading are no longer regarded as conveniently separate spheres but recognized as deeply entangled and intertwined *Diffraction Reading* ultimately represents a new reading of reading itself firstly by critiquing the distanced perspective of critical paradigms such

as translation and intertextuality in which texts encountered processed or otherwise subdued secondly showing how all literary and cultural readings represent different agential cuts in the world text reader constellation which is always both discursive and material and thirdly the volume materializes dynamizes and politicizes the activity of reading by drawing attention to reading's intervention in and co-creation of the world in which we live

Double Helix History Jerome De Groot, 2022-08-29 *Double Helix History* examines the interface between genetics and history in order to investigate the plausibility of new knowledge derived from scientific methods and to reflect upon what it might mean for the practice of history Since the mapping of the human genome in 2001 there has been an expansion in the use of genetic information for historical investigation Geneticists are confident that this has changed the way we know the past This book considers the practicalities and implications of this seemingly new way of understanding the human past using genetics It provides the first sustained engagement with these so-called genomic histories The book investigates the ways that genetic awareness and practice is seemingly changing historical practice and conceptualisation Linking six concepts Public Practice Ethics Politics Self and Imagination *Double Helix History* outlines the ways that genetic information being postgenomic the public life of DNA and the genetic historical imaginary work on the body on collective memory on the historical imagination on the ethics of historical investigation on the articulation of history and on the collection and interpretation of data regarding the past This book will appeal to researchers and students alike interested in DNA genetics and historiography
